

REQUIREMENTS FOR OBTAINING A FALCONRY LICENSE

If you are applying for your first falconry license, you will be required to take and pass a supervised written examination. This examination is designed to test your knowledge of the California laws pertaining to falconry, your competency in caring for raptors, and your knowledge of the life history of birds of prey. You must be at least 12 years of age or older to be issued an Apprentice Falconry License. As an Apprentice, you may possess only a red-tailed hawk or an American kestrel.

You must pass the examination before a license may be issued. Pursuant to Section 670(e)(3), Title 14, of the California Code of Regulations (CCR), any applicant who fails to pass the examination, may retake it no earlier than the next business day following the day of the failed examination. An applicant shall submit the nonrefundable falconry examination fee specified in Section 703 each time the applicant takes an examination.

To become qualified for a *falconry* license:

1. **STUDY STATE LAWS AND REGULATIONS PERTAINING TO FALCONRY**

The enclosed laws pertaining to falconry are found in California Fish and Game Code Sections 395 and 396, and Section 670, Title 14, of the CCR. The Falconry License Laws and Regulations (DFW 360e) is available online at wildlife.ca.gov/Licensing/Falconry.

2. **BECOME FAMILIAR WITH THE CARE OF RAPTORS AND THE ART OF FALCONRY**

References are available on the web, at your library or bookstore, which will acquaint you with caring for a raptor, as well as how to go about training it for falconry. Particular attention should be directed to the diseases and the sanitary problems you will face in keeping a bird in captivity.

3. **BECOME FAMILIAR WITH THE NATURAL HISTORY OF RAPTORS**

It is important to know as much as possible concerning identification of raptors and their habits. Much can be learned from reading, but nothing replaces many hours in the field observing birds in the wild. If you are unable to locate literature about falconry on the web, at your local library or bookstore, you may be able to locate vendors by accessing the California Hawking Club's website at calhawkingclub.org.

For more information on obtaining a sponsor, contact the California Hawking Club:

Northern California (North of Fresno)

Bridget Maguire-Colton

Southern California (South of Fresno)

Rick Lewis
Chairperson of the Apprenticeship Program
Email: akfalcosparverius@gmail.com

4. **FALCONRY EXAMINATION**

When you are ready to take the falconry examination, notify the nearest Department of Fish and Wildlife office listed on the back of this notice and ask for an appointment to take the examination. Take the completed New Falconry License Application (DFW 360b), which is available online at wildlife.ca.gov/Licensing/Falconry, along with the nonrefundable falconry examination fee, to a Department of Fish and Wildlife office and present them to the examination administrator on the day of your examination. You will be required to provide photo identification at the time of the examination.

The examination will be supervised and is closed book. It covers information relating to sections 1, 2, and 3 listed above. Please allow a maximum of two hours to take the examination. The test will be corrected at the time of the examination and you will be given the test results.

5. **INSPECTION OF RAPTOR FACILITIES AND FALCONRY EQUIPMENT**

Once you pass your falconry examination, you must submit the New Falconry License Application, along with the license fee, application fee and inspection fee, to the address listed on the application. A Department employee will contact you to schedule an inspection of your raptor facility and falconry equipment. A Department employee must inspect and approve your raptor housing facilities before a falconry license can be issued. **Please allow 45 business days to process the application.** If the applicant or licensee is sharing an existing raptor facility with another licensed falconer, and possesses proof of a passed inspection, there is no requirement for an additional inspection.

6. ISSUANCE OF THE FALCONRY LICENSE

Once your facilities have been inspected and the License and Revenue Branch has reviewed your completed New Falconry License Application, the application and information will be sent to the Department's Wildlife Branch in Sacramento, California for final approval. If approved, the License and Revenue Branch will issue and forward your falconry license to you.

7. FACILITIES TO HOUSE YOUR RAPTOR

Proper housing is one of the most essential ingredients of successful falconry. (Section 670(j), Title 14, of the CCR) Mews (hawk houses) vary in size and construction. For more information regarding raptor housing specifications and other facility standards, refer to Part 21.29 and 21.30, Title 50, of the Federal Code of Regulations (CFR) available online at: <http://www.fws.gov/migratorybirds/mbpermits/regulations/part21.pdf>

8. REPORTING CAPTURE OF RAPTORS FROM THE WILD

A Resident Falconer Raptor Capture, Recapture and Release Report (DFW 360f) at wildlife.ca.gov/Licensing/Falconry, must be completed and submitted within 10 calendar days to the Department's online reporting system. If a licensee is unable to use the Department's online reporting system, the licensee may submit relevant forms by mail, fax, or email to the Department's License and Revenue Branch, or the licensee may report over the telephone to the License and Revenue Branch. The information will be entered into the Department's online reporting system by Department staff, and the Department shall charge a nonrefundable administrative processing fee, as specified in Section 703, for each form entered.

9. GENERAL LICENSE INFORMATION

Falconry licenses are valid from July 1 through the following June 30. Regardless of when you obtain your falconry license during the year, you **MUST** renew your falconry license on or before the following July 1 if you possess a raptor or want to keep your falconry license active. When practicing falconry, the falconer must have in their immediate possession a valid original falconry license, a valid original hunting license, and any required stamps. Prior to obtaining your first hunting license, you will be required to take the hunter education course. Information about hunter education is available at wildlife.ca.gov/Hunter-Education.

10. ADVANCEMENT FROM APPRENTICE CLASS

You must be licensed as an Apprentice falconer with a sponsor, for at least two years, and be at least 12 years of age. If an applicant is less than 18 years of age, a parent or legal guardian shall co-sign the application and shall be legally responsible for activities of the Apprentice falconer. An Apprentice falconer shall submit a completed Apprentice Falconer's Annual Progress Report, as specified in Section 703, to the address listed on the report. The report shall demonstrate that the Apprentice falconer has practiced falconry with a raptor at the Apprentice class, including maintaining, training, flying, and hunting with the raptor for at least four months in each license year, and a summary of the species the Apprentice possessed, how long each was possessed, how often each was flown, and methods of capture and release. Within the report, the sponsor shall certify in writing to the department that the Apprentice falconer has met the requirements of these regulations..
