

WELCOME TO THIS BEGINNER LEVEL YOUTH FISHING CLINIC!

This is designed as a family event which teaches beginner level fishing skills to new anglers. The clinic consists of several stations which cover basic fishing skills: safety, ethics, and how to keep water clean. It generally takes about 45 minutes from the time you register to complete the clinic.

To make a successful event for all, please observe the following:

- 1 Children must be 5 years or older. Participants must complete the clinic to receive tackle, bait, and to fish in the reserved area.
- 2 A valid drivers license is required to check out a fishing rod. A maximum of 2 rods may be lent per family and all anglers are required to use our equipment.
- 3 All California fishing regulations, local and park ordinances apply. Persons 16 years or older must display a valid California fishing license to fish.
- 4 Clinic participants are expected to watch over and control their fishing rods, cast in a safe manner, and act in a safe and courteous manner to others.
- 5 Parents and adults must remain with and supervise their children at all times, including during the clinic.
- 6 This event is not intended for organized groups. Each adult may register a maximum of 2 children.
- 7 Clinic staff reserve the right to move anglers to another part of the lake.

We appreciate your cooperation and help in making this a successful event for all!
