

INTERNATIONAL ARTIFICIAL REEF

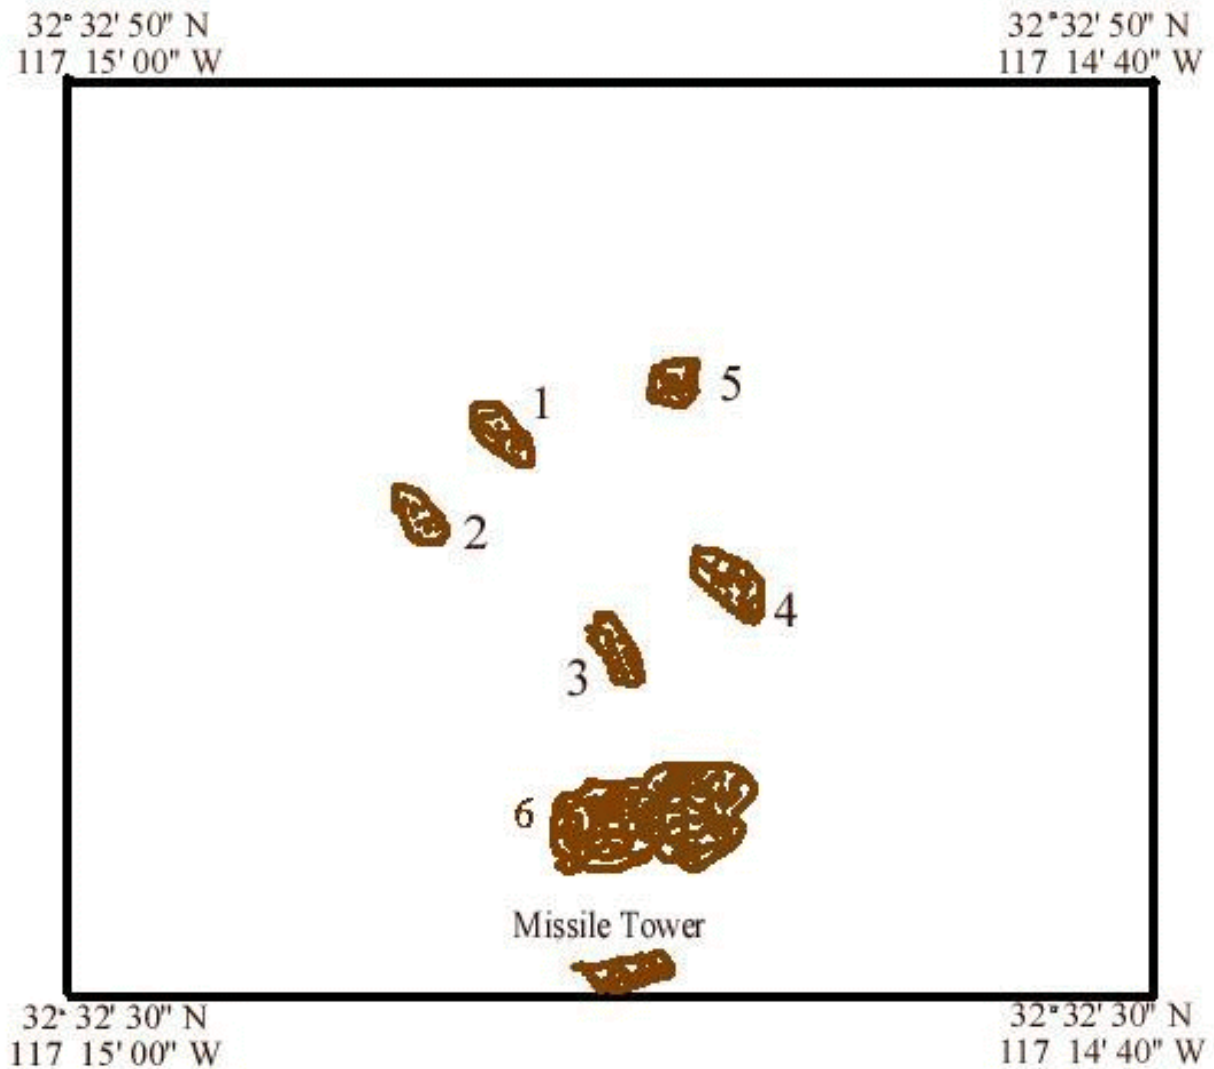

Compass Bearing
Year Constructed
Materials Used

190° (mag) from Point Loma at 7.1 N miles.
 1992 - present **Area** 75 acres
 25,000 tons quarry rock, concrete and steel missile tower, 300 tons concrete rubble.

Comments

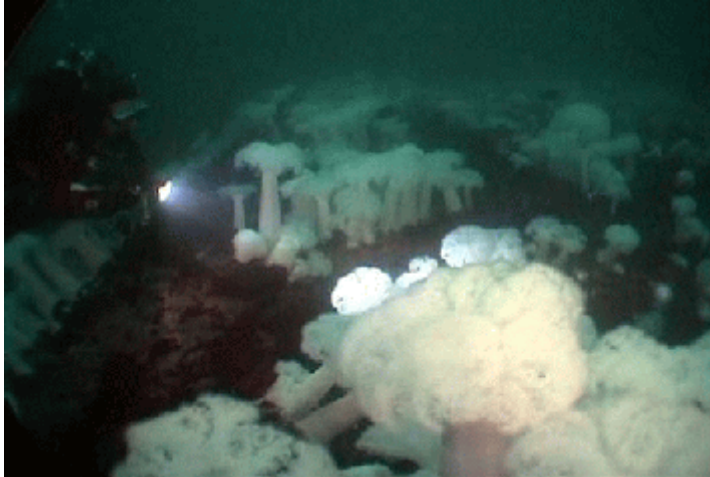

Still under construction, this reef is the deepest of the Fish and Game reefs (165 ft.) This is an excellent fishing reef for sand bass and surface fishes in the summer months and rock fish in the winter months. The reef is too deep for sport diving, however some local technical, mixed gas divers have photographed the Trident missile test tower.
