

# MONTHLY SQUID REPORT

## April 2007

### Monterey

There was one landing in April. Fishing took place off Monterey. Sampled squid averaged 28 g (+/- 6g standard deviation), and the average mantle length was 112 mm (+/- 8mm standard deviation). Observed incidental catch included kelp, surfgrass, and Turkish towel.

### Ventura/Port Hueneme/Santa Barbara

There was one landing in April. The landing did not occur until the end of the month, and consisted of relatively small squid. Fishing took place off the south side of Santa Cruz Island.

### San Pedro/Terminal Island

Landings decreased considerably with only 7 tons landed in April. These landings did not occur until the last two weeks of the month. Vessels fished off Santa Catalina Island. High winds hampered the fleets fishing efforts this month.
