(continued on next page)

\* Counts were made during diving surveys.

† Locations of Mad River stream sections used in Table are on next page.

‡ Half-pounders consisted of 14 to 16 inch steelhead.

<sup>a</sup> Twenty-five additional adults were observed while spot checking portions of reaches B and D.

<sup>b</sup> Only a portion of reach C was surveyed (Anderson Ford to Wildcat Creek) and 10 adults were observed.
