Subject: 1980 Woolley Creek Summer Steelhead Survey

During the week of August 10, 1980, subject survey was made in cooperation with the USFS and H.S.U. from 1/4 mile above Big Meadows Creek to the mouth. A total of 165 summer steelhead and 43 spring run king salmon were counted (see attached map). Suckers were also noted.

An angler caught steelhead had a crawfish in its stomach.
