Subject: Steelhead at Mill and Deer RST's
Attachments: Mill_Deer RST SH.xls

Good Afternoon Chris,

Attached is a spreadsheet showing Steelhead catch at the Mill and Deer Creek RST's. The Deer Creek data is from 1994 thru 2007, and the Mill Creek data is from 1995 thru 2007. Up until year 2000 the traps were only fished Oct thru January (primarily for monitoring spring-run yearlings). Since year 2000, the traps have been fished thru May (or until flows or temperature limit catches).

The traps are not fished continuously. They are pulled at flows above ~ 1200 cfs and when making major trap repairs.

I've included fish trapping info in the attached spreadsheet, including: length, count, weight, life stage and location.

Let me know if this meets your data needs and If I can be of further assistance.

Colleen
