The 2002 Restricted Access Team

Restricted Access is the process of limiting the California commercial fishing fleet to a size that matches the size of the fishing resource. The Restricted Access process runs parallel to the Nearshore Fishery Management Plan, and will be adopted into regulation separate from the NFMP. Input from the team has helped frame the ultimate structure of the preferred alternative of the NFMP. The Department would like to thank the following team members for their hard work in meeting with members of the public, specifically the fishing industry, in an attempt to bring a fair and equitable resolution to the issue of Restricted Access. The team includes:

Barsky, Kristine. Senior Marine Biologist. CDFG. Santa Barbara, CA (lead)
Bishop, Traci. Associate Marine Biologist. CDFG. Santa Barbara, CA
Heneman, Burr. Director. California Ocean Policy Project. Bolinas, CA

Tillman, Terry. Senior Biologist Specialist. CDFG. Sacramento, CA
Weber, Michael. Marine Advisor. CA Fish & Game Commission. Redondo Beach, CA

The 2001-2002 Constituent Involvement Team

The Department is committed to public involvement in the initial draft, redraft and finalization of the NFMP. This includes input from the public, industry, conservation interests, academics and special advisory panels. The 2002 Fishery Control Rule Authors

Fishery Control Rules are the preferred management objective in the 2002 redraft of the Nearshore Fishery Management Plan. Over the period of the redraft, an inspired and energetic team added both insight and substance to the Fishery Control Rules, resulting in the development of depth and breadth to their application for NFMP. To that team, the Department would like to extend its gratitude for the significant 'value-added' material in that critical section.

Barnes, Tom. Senior Marine Biologist Specialist. CDFG. La Jolla, CA
Heneman, Burr. Director. California Ocean Policy Project. Bolinas, CA

Reviewers:

MacCall, Alec. Fisheries Biologist. National Marine Fisheries Service. Santa Cruz, CA
Mangel, Marc. Professor. UCSC. Santa Cruz, CA

The 2002 Environmental Document Legal Team

Certain state agencies, operating under their own regulatory programs, generate a plan or other environmental review document that serves as the functional equivalent of an EIR. The Environmental Document for the NFMP required the focus of a CEQA analyst with support from the legal branch of CDFG. The Department would like to thank the following people for attention to the important analysis of impacts from the NFMP framework:

Malcolm, Ann. Deputy General Counsel. CDFG. Sacramento, CA
Mattox, John. Staff Counsel. CDFG. Sacramento, CA
Milton, Joe. Staff Counsel. CDFG. Sacramento, CA
Tasto, Bob. Senior Environmental Scientist. CDFG. Monterey, CA

The 2001-2002 Research Protocols Team

The Peer Review Panel - NFMP 2001-2002

Peer Review is the process of convening a panel of scientists to review any proposed Fishery Management Plan. The Peer Review Panel analyzes the strengths and weakness of the Plan and recommends strategies that will guide and secure a scientific basis for management. Under the guidance of Bill Leet and Chris Dewees of U.C. Davis, a Peer Review Panel of scientists was established. The Department would like to thank the contributions of the peer reviewers:

Gunderson, Don. Professor. Aquatic and Fishery Sciences. U.W. Seattle, WA
Larson, Doug. Marine Economist. U.C. Davis. Davis, CA
Sampson, Dave. Assoc. Professor of Fisheries. O.S.U. Newport, OR

The 2002 Technical Editing and Graphics Design Team

The Department is committed to producing documents that can communicate the complexity of resource management to the public, and provide a forum for the public's response. The technical editing and graphics design team worked with the authors to produce a more public-oriented version of the original 2001 draft NFMP. The Department wishes to thank the design and technical editing team:

The 2002 Nearshore Fishery Management Plan Redraft Coordination Team

David Bunn, Deputy Director of Legislative Affairs CDFG, is an active supporter and mentor, providing guidance on the role of the MLMA in fishery management plans. His direction contributed to a plan which is consistent with CDFG policies and that will provide for a sustainable fishery long into the future.

Patricia Wolf, Regional Manager for the CDFG Marine Region in Los Alamitos provided oversight, coordination with the Directorate and Fish and Game Commission, and active support for the development of broad initiatives and the public process.

Eric Knaggs, Research Manager with CDFG in Monterey, provided active facilitation of staff, resources, time and space for the completion of the NFMP redraft.

Mike Weber, Marine Advisor for the CA Fish and Game Commission, was the author for the NFMP redraft. His guidance was essential to keeping the plan consistent with the MLMA. He has pioneered a new style of public document, one that allows for broad public understanding and utility.

Nancy Wright, Research Analyst with CDFG in Monterey, was the NFMP redraft coordinator.

The Department would like to thank these people for the dedication and tenacity they showed in the development of the Nearshore Fishery Management Plan.
