

California MLPA Master Plan Science Advisory Team
Draft External Data Formally Submitted to the Master Plan Science Advisory Team
June 16, 2009

Based on experiences in prior MLPA study regions, the MLPA Master Plan Science Advisory Team (SAT) anticipates that external groups will submit data intended to enhance SAT analyses and evaluations. However, data submissions may be numerous, and may come from a variety of sources, in a variety of conditions, covering a wide range of topic areas. A protocol for dealing with incoming data from external sources was adopted by the SAT at its February 24, 2009 meeting. This protocol was adopted to more efficiently and effectively determine whether such data are beneficial to incorporate as the SAT conducts scientific evaluations in support of the MLPA process. Below is a draft list of formally submitted external data received to date that have gone through the staff review process.

Submitted By	Organization	Date	Type of Data	Data Format	Recommendation/Status
Mark Abramson	Baykeeper-Light Hawk data	5/18/2009	Consumptive/non consumptive use (boat locations)	GIS shapefile	Not yet used but has potential for incorporation into MarineMap
Patty Doerr	Partnership for Sustainable Oceans	5/13/2009	Consumptive use (kelp bass)	Summarized/raw catch data	Data not yet used but most relevant for levels of protection work group
Scott Kimura	Tenera Environmental & U.S. Minerals Management Service	5/1/2009	Habitat data (surfgrass)	GIS shapefile	Data used in SAT surfgrass habitat evaluations
Joseph Farlo	Consumptive diver (public)	4/29/2009	Water quality	Government publication	Submitted paper cited in the SAT water quality guidance document
Brian Moore	Biosonics	4/22/2009	Habitat data (Laguna Beach area)	GIS shapefile	Data used to inform the max kelp line used in habitat representation evaluations
Paul Romanowski	L.A. Fathomiers	4/21/2009	Consumptive use (spearfishing)	Raw catch data	Data not yet used but most relevant for levels of protection work group
Patty Doerr	Partnership for Sustainable Oceans	4/2/2009	Consumptive use (CPFV)	Summarized/raw incidental catch	Data not yet used but most relevant for levels of protection work group
Gary Gallegos	San Diego Association of Governments	12/12/2008	Shore management	Government publication	Used to help develop the beach manipulation guidance document

Note: This is a draft list of external data submitted to date which only includes data that have gone through the external data review process.
