DFG Climate Training Course and Network Work Group
Work Group Objectives/Tasks
March 4, 2012

**Purpose:** Work collaboratively to develop a climate training course for DFG staff and partners and an accompanying online climate training network that will support capacity building and improved climate literacy.

**Workgroup Objectives:**
1. Develop a climate training course that provides a basic foundation of knowledge on climate change for DFG staff and partners with the goal of building capacity and empowering staff to become emerging climate leaders in their agency/organization.
2. Lay the foundation to begin building a web-based climate training network of existing online resources such as webinars, forums, workshops, etc that can support improved information sharing and climate literacy.

**Near Term Tasks:**

*Climate Course*
- Identify appropriate course topics/schedule
- Identify speakers
- Identify key readings
- Design effective and engaging forum
- Design range of final project
- Promote networking with partners

*Training Network*
- Identify webinar resources
- Brainstorm effective organization of the network website
- Identify options for housing/building the network
- Work as a team to identify a process that we might follow to create this web-based one stop shop for climate specific training materials.
- Discuss options for how to maintain this network over time to benefit all interested users.
