

## Geographic Review Panel 2 - Sacramento River/Butte Basin

**Proposal number:** 2001-H200

**Short Proposal Title:** Lassen NF-Butte,  
Deer, Mill Crks

- 1. Applicability to CALFED ERP Goals and Implementation Plan and CVPIA priorities, and relevance to ERP and CVPIA priorities for your region.** Roadcuts have been identified as the primary source of sediments in the upper watersheds of the spring-run creeks. Project will be beneficial in reducing sediments in areas in which spring-run chinook salmon spawn.
- 2. Linkages/coordination with previously funded projects or other restoration activities in your region.** This is a continuation of a formerly funded project. AFRP is funding similar work on private property on Deer Creek.
- 3. Feasibility, especially the project's ability to move forward in a timely and successful manner.** Implementation portion of the project is feasible.
- 4. Qualifications of the applicants and others involved in implementing the proposed project.** Applicants are highly qualified.
- 5. Local involvement (including environmental compliance).** Benefits include increased public stewardship, education, and outreach. Project has strong local support.
- 6. Cost.** Costs seem appropriate.
- 7. Cost sharing.** Substantial cost sharing.
- 8. Additional comments.**

---

### Regional Ranking

**Panel Ranking:** High

### Provide a brief explanation of your ranking

Addresses identified threat in high priority spring-run watersheds.
