

Geographic Review Panel 2 - Sacramento River/Butte Basin

Proposal number: 2001-K209

Short Proposal Title: Estimating Abundance of
Juvenile Winter Run Chinook

- 1. Applicability to CALFED ERP Goals and Implementation Plan and CVPIA priorities, and relevance to ERP and CVPIA priorities for your region.** Consistent with CALFED and AFRP goals and priorities.
- 2. Linkages/coordination with previously funded projects or other restoration activities in your region.** Builds on a program that started in 1981. Links with Red Bluff Diversion Dam passage program and winter run recovery program.
- 3. Feasibility, especially the project's ability to move forward in a timely and successful manner.** Feasible, based on proven past performance.
- 4. Qualifications of the applicants and others involved in implementing the proposed project.** Good qualifications-project ongoing since 1981.
- 5. Local involvement (including environmental compliance).** Minimal
- 6. Cost.** Appropriate.
- 7. Cost sharing.** No partners
- 8. Additional comments.** Necessary information CALFED and CVPIA need to make decisions. Will provide more quantitative estimation of juvenile winter-run chinook abundance.

Project should have direct line of funding for long-term monitoring.

Regional Ranking

Panel Ranking: High

Provide a brief explanation of your ranking. Restoration efforts upstream of this monitoring point require information from this project. Those projects represent over a quarter billion dollar investment.
