

DFW Climate College

Lecture #8

Title: In it for the long haul: DFW Going Green Sustainability Initiative
Speakers: Crilly Butler, Jr., Senior Information Systems Analyst, DFW
Whitney Albright, Climate Change Associate, DFW
Date: April 11, 2013 (Thursday)
Time: 1:30 – 2:30PM
Location: DFG headquarters in Sacramento, Resources Agency Auditorium
WebEx: Lecture also available to view via WebEx. We encourage DFW staff participating remotely to watch the lectures together by reserving a conference room with DSL. The powerpoint presentation will be posted in advance to minimize interruption for remote users due to WebEx or bandwidth complications. Because of a limit to the number of WebEx participants, we encourage those in the Sacramento area to attend in person.

Registration for Lecture #8

[DFW STAFF CLICK HERE TO REGISTER](#)

ALL OTHER PARTICIPANTS: If you are not a DFW staff member please email Registrar@wildlife.ca.gov with your name, email address, organization, and whether or not you intend to participate in-person or via WebEx.

*Note: Please register at least two days prior to the lecture. If you would like to be registered for ALL classes at once, please submit a request to Registrar@wildlife.ca.gov.

Speaker Biographies

Crilly Butler, Jr. is a Senior Information Systems Analyst with the California Department of Fish & Wildlife. A licensed psychotherapist, he switched careers when he realized that a computer would never call him at 2:00 AM threatening to jump. He specializes in database and data warehouse design and development; information systems and business analysis; Web design, usability and architecture; and leveraging his past training in interpersonal communication to “build bridges.” A previous software project he led was accepted into the Smithsonian’s permanent research collection in the year 2000. He’s currently a member of the department’s Green Team.

Whitney Albright is a Climate Change Associate with the California Department of Fish and Wildlife, working to help facilitate the integration of climate change into Department programs, policies, and activities as appropriate. She also serves as a liaison between the Department and

the four Landscape Conservation Cooperatives in California. Before joining the Department in 2011, Whitney worked as a Research Scientist at the University of Washington studying the affects of climate change on natural systems in the Pacific Northwest. Whitney holds a Bachelor of Science degree in meteorology from the University of Oklahoma and a Master of Science degree in forest ecology from the University of Washington.

Optional additional companion webinars from the National Climate Academy
