Site Name: 1930's Utility Bridge near Eureka Rd and Taylor Rd.

Stream Name: Secret Ravine

Structure Owner:

Year Remediated: 2011

Site Type: Utility crossing

Site Status After Remediation: Remediated, fish response unconfirmed

Species Benefited After Remediation:

Immediate Downstream barrier PAD ID:

PAD ID: [758238](#)

Tributary To: Miners Ravine

Barrier Remediation By: Dry Creek Conservancy

Barrier Description Prior to Remediation:

Count of Barriers Downstream:

Count of Barriers Upstream:

Distance Upstream to Next Barrier or Limit of Anadromy : _____ Miles

*Site statistics based on June 2015 version of the Passage Assessment Database

Notes: Bridge removed and pipeline dismantled and hauled away opening at least 10 miles of stream above. Dry Creek Conservancy and the City of Roseville removed this barrier. BEFORE: utility pipes with concrete apron, obstacle to fish passage: at low flow conditions fish may pass but may be injured due to the abrasive surface of the apron, at higher flows the pipes may be passable but may present substantial delays and possible injuries to migrating fish.
