

Appendix A: Multi-Species Conservation Strategy Milestone Progress Summaries and Project Linkages

This table presents progress summaries by milestone of achievements by ERP, Water Quality Program and Watershed Program contracts of the CALFED Program, and AFRP and CVPIA contracted projects towards meeting each Milestone. Each Milestone summary was derived from contract information examined during office reviews and verified with persons familiar with the project from the field.

MS Number	Milestone number 1-119
Region	Regional location of milestones delineated as Delta and Eastside Tributaries (Delta), Suisun Marsh and North San Francisco Bay (SMNSFB), Sacramento (SAC), and San Joaquin Region (SJR)
Project Type	Project types are delineated as Stressors (SR), Habitats (H), and Ecological Processes (EP)
Milestone	Milestone
ERP Targets taken from ERPP Vol 2	Restoration targets identified in ERPP Vol 2
MS Components or Questions for Field Personnel	Since many of the milestones have more than one requirement, and consequently addressed multiple topics and goals, they were be broken down into several subcomponents prior to making associated project linkages.
ERP Project Numbers	Appropriate contract or program ID number
Start Date	Contract start date
End Date	Contract completion date
CALFED Award	CALFED funds granted
Cost share	Cumulative cost share from all non-CALFED sources, if any
Total Project Cost	CALFED funds and cost share funds
Applicant	Agency contract applicant
Principal Investigator	Project contact at time of application
Quantifiable Units	Quantifiable parameters (e.g. acres, miles, number of diversions, etc.). For multi-phased restoration projects, quantifiable units were only noted on completion of the implementation phase.
Comments	The rationales used to link any contracted project to a milestone are presented in the comments column. Linkage rationales based upon in-house contract review are presented in regular type. Field review information based on interviews of knowledgeable field personnel contacted to clarify the accuracy of the initial milestone linkage information is presented in <i>italicized/bold type</i> . If field contacts had ancillary information that helped determine progress toward any milestone, those comments were noted.
