#7. Sacramento River Riparian Restoration Planning, Rancho Breisgau and Jelly's Ferry Shasta and Tehama Counties

Andrew Jelly settled at the Jelly's Ferry site in approximately 1850. The project site was cleared and farmed over 150 years ago. Photo 4 shows the former agricultural field with Mt. Lassen in the background. #7. Sacramento River Riparian Restoration Planning, Rancho Breisgau and Jelly's Ferry Shasta and Tehama Counties

The loam soils at Jelly's Ferry will support restoration of oak woodland savannah, oak grasslands, and Valley oak woodlands. A small linear area (about two acres) on right shows lower topography that floods during high water events on the Sacramento River.

#7. Sacramento River Riparian Restoration Planning, Rancho Breisgau and Jelly's Ferry Shasta and Tehama Counties

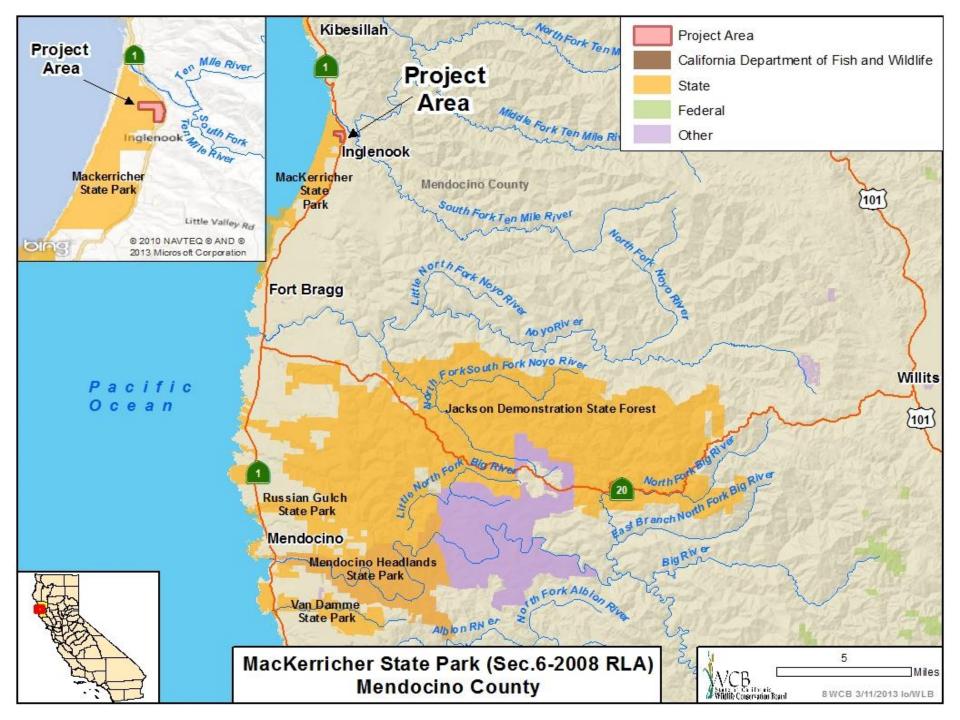

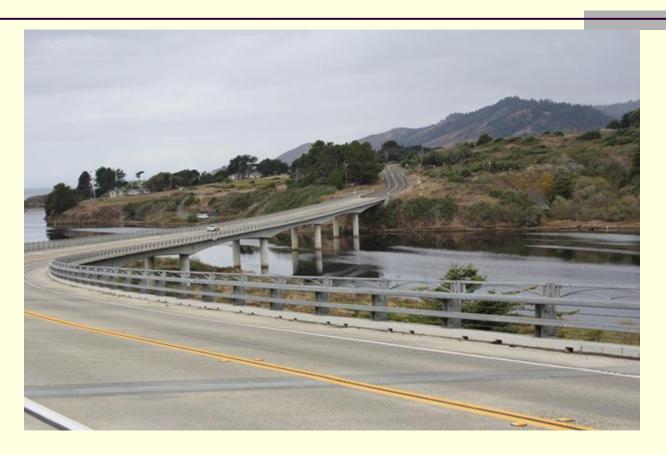

Grain field at Rancho Breisgau to be restored to riparian forest.

#7. Sacramento River Riparian Restoration Planning, Rancho Breisgau and Jelly's Ferry Shasta and Tehama Counties

Remnant riparian vegetation exists along the Rancho Breisgau's perimeter which can be seen in the distance.

 Property is located just south of the Highway One bridge over Ten Mile River

The property has undulating hillsides and has excellent westerly facing views that overlook the MacKerricher State Park sand dunes and the Pacific Ocean.

Project Description

Restore ecosystem processes that are crucial to the viability of endangered species and their habitats in the Inglenook Fen-Ten Mile Dunes Natural Preserve by:

- Removing non-native plants, including European beachgrass and iceplant using hand labor.
- Reestablishing native plants, including endangered species, by seeding, transplanting, or installation of cuttings.

Western Snowy Ployer
