

2026 Provisional Stocking Document for Trout and Inland Salmon

The Mission of the California Department of Fish and Wildlife (Department) Trout and Inland Salmon Hatcheries and Stocking Programs is to provide fish for recreational angling and conservation purposes based on the best available science and ecological principles. The Annual Provisional Stocking Document will provide public notice of the Department's intended plans for fish plants to assist the angling public in planning future fishing and recreational trips. The Department's execution of these plans is not guaranteed. The Department may not be able to adhere to the provisional stocking dates and places due to various unforeseen conditions, including, but not limited to, weather, disease, staffing, and funding. The Department recommends the public use the [Fish Planting Schedule](#) linked to the Department's Hatcheries webpage for current information. The Fish Planting Schedule provides information on releases that have recently occurred and planned releases in the immediate future, typically within two weeks.

ACRONYMS AND DEFINITIONS

Inland Regions

R1: [Northern Region](#)

R4: [Central Region](#)

R2: [North Central Region](#)

R5: [South Coast Region](#)

R3: [Bay Delta](#)

R6: [Inland Deserts Region](#)

Species

[Rainbow Trout \(native\)](#): most popular cold-water species due to its willingness to take all forms of tackle and bait and fighting ability.

[McCloud River Redband Trout \(native\)](#): endemic to the McCloud River watershed having bright colors with a brick red lateral band.

[California Golden Trout \(native\)](#): widely regarded as one of the most beautiful trout in the world and is endemic to California in the Kern River basin. Now stocked throughout California.

[Eagle Lake Trout \(native\)](#): endemic to Eagle Lake and known for fast growth rates and prized fighting ability.

[Lahontan Cutthroat Trout \(native\)](#): an iconic native fish with two distinctive forms, a lake-form known for their size and a highly patterned stream form.

[Brown Trout \(non-native\)](#): larger fish are known to be wary and considered a challenging yet rewarding fishing opportunity.

[Inland Chinook Salmon \(native\)](#): Chinook Salmon planted in select reservoirs as fingerlings and allowed to naturally grow to a catchable and trophy size.

[Kokanee \(non-native\)](#): land locked Sockeye Salmon planted as fingerlings in upwards of 23 lakes and known to be hard fighting and excellent table fare

Titles in blue are hyperlinked for more information.

Release Sizes

Fingerling: less than 5”.

Sub-catchable: approximate 5”-7”.

Catchable: approximate 7”- 12”.

Super-catchable: approximate 12-19”.

Trophy: larger than 19”.

Release Program

Put and Take (catchable, super-catchable and trophy) - fish are planted with intent to provide immediate fishing opportunities.

Put and Grow (fingerling and sub-catchable) - fish are planted into productive habitats that provide natural growth to achieve catchable sizes in following years.

Table 1. 2026 Provisional Stocking Plans by Species, Water and Time Period.
