

# The Globally Harmonized System for Hazard Communication

## California Department of Fish & Wildlife

### Employee Verification Form

#### Employee Information

Name:

DATE:

Position:

Address:

Supervisor:

Please send my Certificate of Completion to this email address:

On this date I received training on the changes to the Hazard Communication Standard.

The training included the new label elements and 16 section format Safety Data Sheets described as the ***Global Harmonized System of Classification and labeling of Chemicals.***

Training included the following sections. Initial your level of understanding below:

#### LABELING ELEMENTS:

**Product Identifier:** How a chemical is identified on the label

**Signal Word:** Significance of ***Danger*** and ***Warning*** on the label

**Pictograms:** Significance of the 9 different symbols on the label and SDS

**Hazard Statements:** The different types of hazards and the degrees of hazards

**Precautionary Statements:** Phrases that describe things that should be done

Understanding on how the different label elements work together

#### **New Safety Data Sheets (SDS):**

Standard 16 section format of the SDS and the type of information in each section

How the information on the SDS relates to the information on the label

	Fully Understand Material	Do Not Understand Material
