**When will they hatch?**

__________ need __________ T.U. to hatch.

**Hatchery Data:**

Date eggs were fertilized:

Date eggs arrived in your room:

TOTAL DAYS spent at the hatchery

Average hatchery water temperature

\[
\text{T.U.} \times \frac{\text{day}}{\text{T.U.}} = \text{T.U.}
\]

**In the Classroom:**

Total T.U. required for hatching:

Thermal units at hatchery:

Thermal units still needed:

Average water temperature has been:

This means that _______ T.U. will accumulate each day.

Our fish will hatch in _______ days!

The date will be: _______
