Union Valley

Mr. Robert D. Montgomery
Regional Manager, Region II
Department of Fish and Game
1001 Jedsmith Drive
Sacramento 19, California

Dear Mr. Montgomery:

Thank you for your letter of May 19 in which you make us aware again of the importance of keeping turbidity at a minimum downstream from construction activities at Union Valley. You may be sure that the same precautions will be taken at Union Valley as have been taken at Ice House where a settlement basin of some proportion is in operation. Even these precautions do not always produce the desired results and we will be constantly on the alert regarding this problem.

If at any time the control of this problem does not appear satisfactory to your men in the field, please have them get in touch by telephone with the District's Project Engineer, Clyde Spencer, who will want to know about it without delay.

Sincerely,

Paul E. Shaad
Assistant General Manager
