

# Memorandum

To : Carrol Faist

Date: July 6, 1976

From : Department of Fish and Game

Subject: Aerial Fish Plants

This confirms the verbal understanding reached with Jim Ryan that the following lakes can be used to "dump" fingerlings in the event of a mix up in the air:

Aloha, El Dorado County

Stony Ridge, El Dorado County

Gold, Sierra County

Lower Blue, Alpine County

It is our understanding that once fish are placed in the hopper they cannot be removed without planting them. An accident requiring "dumping" is expected to be rare.
