

— Run Spotswood  
of Palo Alto

Regarding the lakes above Fallen Leaf Lake, he also made a few comments. He says that Susie Lake is full of "chubs" and that they caught no fish from it and their guide reports that no one has caught trout in it for years. The guide believes that this lake should be dynamited and re-stocked. This guide also says that there was another lake with similar conditions, and that a few years ago it was dynamited (many chubs and a few very large trout were killed) and then re-stocked, and that now it furnishes good fishing.

Spotswood says that the fishing in Heather Lake was very poor, but that there were many "nice trout" in it.

Sincerely yours,

Leod.
