George H. Warner, Fisheries Management Supervisor  
State of California  
Department of Fish and Game  
Region II, 1001 Jedsmith Drive  
Sacramento 19, California

Dear Mr. Warner:

Any further news about the installation and servicing of a water flow recorder on Taylor Creek?

There is plenty of water this year in Fallen Leaf Lake to take care of the winter spawning. This adequate supply is because no water was wasted during the year and it does show what can be done by carefully regulating the flow.

The elimination of running water down the fish ladder all during the year and controlling it through the gate valve after fish movement up Taylor Creek had stopped was a great contributing factor to the conserving of water.

Would like to hear from you.

Yours truly,

FALLEN LEAF LAKE PROTECTION ASSOCIATION

H. D. Pischel, Secretary

Mr. H. D. Fischel, Secretary  
Fallen Leaf Lake Protection Association  
984 Mission Street  
San Francisco 3, California

Dear Mr. Fischel:

I sincerely regret the delay on the subject of installing and servicing of a water flow recorder on Taylor Creek.

610.

Don Kelley, our former Fisheries Biologist III, was advanced to a new position last August, his work has been taken over by Bob Butler who came to us in November. A great deal of work has accumulated in Kelley's absence. Bob Butler has been attempting to find a source of funds which can be used to pay for a third of the cost of installation and servicing. He is planning a trip to Lake Tahoe next week and intends to see Mr. Entzinger at the Tahoe U. S. Forest Service Guard Station on this matter.

We shall keep you informed on the progress that is being made.

Sincerely yours,

George H. Warner  
Fisheries Management Supervisor  
Region II

January 8, 1962

George H. Warner, Fisheries Management Supervisor  
State of California Department of Fish and Game  
Region II, 1001 Jedsmith Drive  
Sacramento 19, California

Dear Mr. Warner:

Here we are starting another year and what can we do to  
move along the matter of the installation and servicing of a  
water flow recorder on Taylor Creek?

You may be interested to know that Fallen Leaf Lake is still  
at 2.8 gage level at which it stood on December 31 and which  
was the lowest point it reached since February of that year. *1961*  
This was made possible by proper conservation of the water  
even in the dry year we experienced.

Best regards for the New Year.

Yours truly,

FALLEN LEAF LAKE PROTECTION ASSOCIATION

H. D. Fischel, Secretary
