November 3, 1954

Mr. Vaughn Hofeldt
U. S. Forest Service
Meyers, California

Dear Vaughn:

We have received the permit from the U. S. Corps of Engineers to construct the device that is to keep the mouth of Taylor Creek open. What is the status of our agreement for:

1. A water release from Fallen Leaf Lake.
2. A U. S. Forest Service permit to build.

We have about \$3,000 in our present budget for this project, and we hope to be able to start construction before long so that we will not lose the funds.

Jack Fraser tells me that you people were going to arrange a meeting to discuss the water release problem. Could we meet in the near future?

Best personal regards.

Very truly yours,

D. W. Kelley
Assoc. Fisheries
Biologist
