

J. Ryan

May 12, 1976

Taylor Creek, El Dorado County

Review with District Ranger the Taylor Creek flow plan for May 1976 - April 1977 in regard to providing RT spawning and incubation flows this spring and KOK spawning and incubation flows this fall and winter. Consider use of siphon over old dam if required. Determine what action, if any, we must take.

Prepare draft letter from the Regional Manager to the Forest Service confirming any agreements reached. Inform me if unable to reach agreement.

Due date - May 26, 1976.

Richard D. Beland  
Fisheries Management Supervisor  
Region 2
