The Library

U.S. Geological Survey
522 National Center
Room 2B125
Reston, VA 20192 USA

Telephone: (703) 648-4800
E-mail: [NMD Reference Collection](#)

Hours: 8 a.m. - 4 p.m., Monday - Friday.

This **Reference Collection** was established in 1982 to facilitate access to scientific and technical reports, publications, and information pertinent to USGS mapping research goals. This collection complements, rather than duplicates, the [USGS Library Collections](#). It is classified with the Survey's classification system and cataloged under the Anglo-American Cataloging Rules, 2d edition.

Although the primary purpose of this collection is to support the USGS National Mapping Program, its resources are available to other agencies, universities, research organizations, and the public on an in-house basis and through interlibrary loan. Periodicals, archival maps, and conference proceedings are not available on interlibrary loan. A limited amount of text copying, in accordance with copyright restrictions, is available.

The Reference Collection includes works on:

- Cartography - traditional and automated
- Computer sciences, engineering, and software
- Environment, global change studies, land use and land cover, natural resources studies and planning
- Geography, geographic information systems, land information systems
- Geophysics, geodesy, surveying, photogrammetry
- Optics and photography
- Remote sensing studies
- Space sciences and satellites
- Statistics, mathematics
- Conference, symposia, and workshop proceedings, journals, and serials in the above fields.

The Reference Collection also includes a separate **Reports and Publications Archive**, which consists of a collection of USGS NMD internal research reports, copies of published articles, and project reports by Mapping Division staff members. The materials in this archive are not available for loan, but may be used during the regular hours of service.

Historical Map Archives

U.S. Geological Survey
522 National Center
Room 2B125
Reston, VA 20192 USA

Telephone: (703) 648-4800
E-mail: NMD Reference Collection

Hours: 8 a.m. - 4 p.m., Monday - Friday.

The **Historical Map Archives** were established after publication of the first USGS topographic maps in the early 1880's. The archives include maps from the 1880's to date and are divided into three chronological segments: 1880's-1933, 1934-84, and 1985-to date.

The archives are designed to maintain at least one copy of each published or reprinted topographic sheet but the archives are not complete, especially for the early years. The maps are filed chronologically and alphabetically, by State and by

quadrangle name. Computer-based indexes of the 1880's-1933 and the 1985-to date segments have been prepared.

Archival maps are not available on loan but may be viewed for research purposes.
