Email (optional):	

**Comments/Issues:** I feel your job is to do what is best for fish and wildlife that is related to the preservation of the human population. More fish are killed by catch and release than if you would set a limit for human consumption. Your job is NOT taking taxpayer's money going to meetings that environmentalists are doing anyway. Dirt didn't hurt the fish in the fifties from logging, so why are you restricting it now? There were more fish then. People should be able to cut the burnt trees which breed bugs that kill the forest, and animals. People on roads kill more deer and wildlife than anything else. Slow these people down. Oil and chips on the roads for ice and etc. Run into rivers and creeks and hurts more fish than people. They should be using sand. In your job you should be working with the common man NOT environmentalists!

Please use additional sheets if necessary.
