D. Gilsenan

SJ: Report of 1956 Game Take Hunter Questionnaire

For the third consecutive year, the questionnaire used in the post-season game take survey, has followed the same form. The response to the questionnaire continues high, the return for the 1956 hunting season being 45.2 percent. The methods used prior to 1954 had a response of approximately 35 percent.

The sampling procedure is the same as that used in previous years with an approximate 2 percent sample of hunting licenses being selected statewide.

Hunting License Sales:

An estimated 670,000 hunting licenses were sold in 1956, which represents an increase of 37,460 or 5.9 percent over the 623,540 licenses sold in 1955.

Results:

The following tables are included in this report:

- 1. Summary of Statewide Game Bag 1956.
- 2. Ten Leading Counties in Bag of Quail, Pheasants, Doves, Pigeons, Ducks, Geese, Cottontail/Brush Rabbits and Jackrabbits.
- 3. Estimated Bag by County Quail, Chukar and Sage Hen.
- 4. Estimated Bag by County Pheasants.
- 5. Estimated Bag by County Doves and Pigeons.
- 6. Estimated Bag by County Ducks and Geese.
- 7. Estimated Bag by County Jacksnipes and Coots.
- 8. Estimated Bag by County Jackrabbits, Cottontail/Brush Rabbits, Tree Squirrels.
- 9. Where Bay Area Hunters Bag their Game.
- 10. Where Los Angeles Area Hunters Bag their Game.
- 11. Where San Diego Area Hunters Bag their Game.
- 12. Where Bakersfield Area Hunters Bag their Game.
- 13. Where Fresno Area Hunters Bag their Game.
- 14. Where Sacramento Area Hunters Bag their Game.

- 15. Where Chico Area Hunters Bag their Game.
- 16. Where Stockton Area Hunters Bag their Game.
- 17. Mailing and Return by County of 1956 Hunter Questionnaires.

QUAIL - 1956 Bag - 1,153,400

The quail bag for 1956 is 10.9 percent below the reported kill for 1955. This downward trend was evident in most of the major quail producing counties where field personnel reported fewer concentrations of birds in areas of past abundance. Exceptions to this trend were in Kern, Tulare and Ventura Counties, all of which showed a substantial increase of quail in the bag.

Quail hunters reported spending an average of 2.6 days hunting their game.

PHEASANTS - 1956 Bag - 744,400

Regulation changes, put in effect for the 1955 season, (season extended from ten to sixteen days and the inclusion of one hen in the bag) were continued for the 1956 season. An increase of 11.7 percent over the 1955 take was reported for all pheasants bagged. Cocks showed an increase of 13.6 percent and hens 3.4 percent. Of the total pheasants bagged, 11.1 percent were banded birds.

Pheasant hunters reported spending an average of 3.8 days in the field.

DOVES - 1956 Bag - 2,808,600

The 1956 dove bag was 9.2 percent higher than was reported in 1955. The reported kill for the coastal counties from San Luis Obispo County to Sonoma County in the north, showed an appreciable increase over the 1955 bag. Improvement is noted also from Kings County through the northern San Joaquin Valley, the Sacramento Valley, the northern and northeastern counties. Tulare, Kern, Ventura, Los Angeles and San Bernardino Counties, which traditionally produce a high dove harvest, had a subnormal rainfall in the winter of 1955-56. Apparently this had an adverse effect upon the feed and water supply. These conditions did not prevail in Riverside and Imperial Counties where hunter success was high.

An average of 2.8 days dove hunting was reported in 1956.

PIGEONS - 1956 Bag - 96,500

The 1956 bandtail pigeon kill dropped about 29 percent below the reported kill for 1955. The greatest decrease was noted in the coastal counties north of San Francisco Bay and in the Sacramento Valley; a wide dispersion of birds was reported in these areas.

An excellent season was reported for Santa Cruz and Monterey Counties. The southern San Joaquin Valley, as well as Ventura and Los Angeles Counties reported a successful season. The reported kill in these areas exceeded the bag reported for 1955.

Bandtail pigeon hunters reported an average of 2.1 days hunting their game.

DUCKS - 1956 Bag - 3,526,000

A straight waterfowl season was in effect in 1956 for the first time since 1952. In the Tule Lake-Lower Klamath Basin the season opened one week earlier than the balance of the State, but less hunter pressure was evident in the area than in previous years. Despite the mild, dry weather, the 1956 season was very successful.

Hunters on private and commercial duck clubs reported taking 44 percent of all ducks bagged in 1956.

On State operated Waterfowl Management Areas, new records were established for total kill, average birds per hunter and hunter use of areas, according to Department of Fish and Game's reports.

Waterfowl Management Area Results

Ducks bagged on Waterfowl Management Areas Reported bag (questionnaire) Known bag Difference Percent of difference	141,680 160,620
Waterfowl Management Area hunter use Number of individual hunters (questionnaire) Known hunter use in days	30,200 48,648

These figures indicate that approximately 62 percent of hunters using Waterfowl Management Areas hunted one time only.

COOTS - 1956 Bag - 389,900

The reported kill for coots cannot be considered complete, as a late season opening date was set (November 17 to March 1).

JACKRABBITS - 1956 Bag - 908,000

The jackrabbit kill was reported as being 26.9 percent below the kill reported in 1955. The lower kill was in evidence, virtually, on a statewide basis. This is in contrast to 1955 reports when many of the counties of the Sacramento Valley and the north coast reported the total bag as being high.

It was reported an average of 4.5 days was spent hunting jack-rabbits.

RABBITS (Cottontail and Brush) - 1956 Bag - 356,000

A decline in kill amounting to 22 percent is shown for most of the major rabbit hunting counties compared with 1955. Exceptions are San Diego and Imperial Counties, which show an increased bag. Rabbit hunters reported an average of 3.4 days hunting their game.

TREE SQUIRRELS - 1956 Bag - 41,700

The tree squirrel bag shows an increase over the reported take in 1955. Some of the squirrels reported were taken in counties with no open season and may have been ground squirrels reported in error.

DEER - 1956 Bag - Bucks 137,600; Antlerless 54,200

The 1956 deer season was the first general either-sex season authorized in California. The last three days of the early season and the last three days of the late season being designated as the periods in which either-sex deer could be taken.

Reported deer kill: Questionnaire Deer tags mailed in Difference Percent of difference	Bucks 137,600 70,371 67,229 95.5%	Antlerless 54,200 38,081 16,119 42.3%
