Hunter game take questionnaires were mailed to 17,327 randomly selected hunting licensees in January 1989. These individuals represented approximately 4.5 percent of the total number of licenses sold (384,096) in 1989. Two follow-up mailings were sent to nonrespondents; the first approximately four weeks, and the second approximately seven weeks after the initial mailing. There were 461 questionnaires returned undeliverable, which left a total of 16,866 possible respondents. A total of 11,890 persons returned the questionnaire, representing approximately 3.1 percent of all hunting license buyers, and a response rate of 70.5 percent. It was determined through the analysis of the survey that there was a hunting effort of approximately 384,096 hunting licensees who spent 5,028,700 days in the field.

For the past several years, follow-up mailings to nonrespondents have significantly increased response to the questionnaires. The increase reduces nonresponse bias, the phenomenon of more successful individuals (e.g., hunters) being more inclined to return a questionnaire than unsuccessful or nonparticipating individuals. Nonresponse bias is one of the principle causes of inflated bag and hunter-use figures in surveys of this type. However, statistical analysis of survey data indicates high validity for species pursued by large numbers of hunters.

HUNTING REGULATION CHANGES

Ducks and Geese

The moratorium on hunting canvasbacks in 1988 was lifted by allowing the take of two redheads or canvasbacks singly or in aggregate.

The second half of the split duck hunting season in the Balance of the State Zone opened on Saturday and closed on a Saturday. In 1988, it opened on Sunday and closed on a Sunday.

The various seasons for snipe hunting were consolidated into a single statewide snipe season of 107 days beginning on the first Saturday in October. This change also resulted in the falconry snipe season ending the same time as the statewide shotgun snipe season.

Waterfowl regulations for the Colorado River Zone will be those set by Arizona hunting regulations for that same zone.

All Hunters = 384,096

Due to one hunter often hunting more than one species, the percent of All Hunters per species totals to more than 100% and the number of hunter per species exceeds the total number of hunters reported (384,096).
