REPORT OF THE 2000 GAME TAKE HUNTER SURVEY

Hunter game take questionnaires were mailed to 23,924 randomly selected hunting licensees on February 24, 2001. These individuals represented approximately 7.6 percent of the total number of licenses sold (314,683) in 2000. A follow-up mailing consisting of the entire hunter game take questionnaire was sent to nonrespondents on May 25, 2001. There were 24 questionnaires returned undeliverable, which left a total of 23,900 possible respondents. A total of 9,902 persons returned the questionnaire, representing approximately 3.15 percent of the total number of licenses sold. It was determined through survey data analysis that there was a total hunting effort of approximately 271,113 hunters who spent 5,913,288 days in the field.

For the past several years, follow-up mailings to nonrespondents have significantly increased response to the questionnaires. The increase reduces nonresponse bias, the phenomenon of more successful individuals (e.g., hunters) being more inclined to return a questionnaire than unsuccessful or nonparticipating individuals. Nonresponse bias is one of the principle causes of inflated bag and hunter-use figures in surveys of this type. However, statistical analysis of survey data indicated high validity for species pursued by large number of hunters. For more information concerning this survey please contact wildlife biologist Pat Lauridson (916-653-1759). This survey has been a cooperative effort between the Wildlife Programs Branch, Conservation Education and Enforcement Branch, and License and Revenue Branch.

* 1989-1991 hunter surveys did not separate wild pheasant bag totals from LGBC bag totals. 1992-2000 data represent exclusively wild pheasant bag.

** 1992-1999 hunter surveys did not distinguish between wild chukar and those harvested on LGBC's. 2000 data are a combination of the two categories.

*** 1999-2000 wild turkey harvest does not include LGBC harvest.

* 1989-1991 hunter surveys did not separate wild pheasant hunters from LGBC hunters. 1992-2000 hunter numbers exclusively represent wild pheasant hunters.

** 1989-1999 hunter surveys did not separate wild chukar hunters from LGBC hunters. 2000 data are a combination of both hunter classifications.

*** 1991-2000 sage grouse hunter data are extrapolated from hunter permits.

**** 1989-1991 hunter surveys did not separate spring and fall turkey hunters. Therefore, hunters reported for these years are a combination of spring and fall hunters. These data also exclude LGBC's.
