## REPORT OF THE 2001 GAME TAKE HUNTER SURVEY

Hunter game take questionnaires were mailed to 52,588 randomly selected hunting licensees on March 22, 2002. These individuals represented approximately 16.8 percent of the total number of licenses sold (312,308) in 2001. A follow-up mailing consisting of the entire hunter game take questionnaire was sent to nonrespondents on June 7, 2002. There were 80 questionnaires returned undeliverable, which left a total of 52,508 possible respondents. A total of 19,151 persons returned the questionnaire, representing approximately 6.13 percent of the total number of licenses sold. It was determined through survey data analysis that in 2001 there was a total hunting effort of approximately 274,067 hunters who spent 5,816,967 days in the field.

For the past several years, follow-up mailings to nonrespondents have significantly increased response to the questionnaires. In addition, a prize drawing was offered this year for the first time in an effort to further increase questionnaire response. These increases in response rates reduce nonresponse bias, the phenomenon of more successful individuals (e.g., hunters) being more inclined to return a questionnaire than unsuccessful or nonparticipating individuals. Nonresponse bias is one of the principle causes of inflated bag and hunter-use figures in surveys of this type. Statistical analysis of survey data indicated high validity for species pursued by large number of hunters.

This survey has been a cooperative effort between the Wildlife Programs Branch, Conservation Education and Enforcement Branch, and License and Revenue Branch. For more information concerning this survey please contact Wildlife Biologist Pat Lauridson (916-445-3701).

\* 1991 and prior hunter surveys did not separate wild pheasant hunters from LGBC hunters. 1992-2001 hunter numbers exclusively represent wild pheasant hunters.

\*\* 1989-1999 hunter surveys did not separate wild chukar hunters from LGBC hunters. 2000-2001 data are a combination of both hunter classifications.

\*\*\* 1991-2001 sage grouse hunter data are extrapolated from hunter permits.

\*\*\*\* 1991 and prior hunter surveys did not separate spring from fall wild turkey hunters. Hunter numbers reported for those years are a combination of spring, fall, and LGBC hunters.
