# REPORT OF THE 2002 GAME TAKE HUNTER SURVEY

Hunter game take questionnaires were mailed to 26,348 randomly selected hunting licensees on March 18, 2003. These individuals represented approximately 8.7 percent of the total number of licenses sold (302,683) in 2002. A follow-up mailing consisting of the entire hunter game take questionnaire was sent to nonrespondents on May 16, 2003. There were 30 questionnaires returned undeliverable, which left a total of 26,318 possible respondents. A total of 9,947 persons returned the questionnaire, representing approximately 3.29 percent of the total number of licenses sold. It was determined through survey data analysis that in 2002 there was a total hunting effort of approximately 259,869 hunters who spent 5,179,085 days in the field.

For the past several years, follow-up mailings to nonrespondents have significantly increased response to the questionnaires. In addition, a prize drawing was offered this year in an effort to further increase questionnaire response. These increases in response rates reduce nonresponse bias, the phenomenon of more successful individuals (e.g., hunters) being more inclined to return a questionnaire than unsuccessful or nonparticipating individuals. Nonresponse bias is one of the principle causes of inflated bag and hunter-use figures in surveys of this type. Statistical analysis of survey data indicated high validity for species pursued by large number of hunters.

This survey has been a cooperative effort between the Wildlife Programs Branch, Conservation Education and Enforcement Branch, and License and Revenue Branch. For more information concerning this survey please contact Wildlife Biologist Pat Lauridson (916-445-3701).
