

ZONE D19

2017 General Deer Hunting Information (Includes Additional Hunt J-14)

GENERAL INFORMATION

This information sheet has been prepared to assist deer hunters applying for, or planning to hunt in Zone D-19, located in portions of Imperial, Riverside and San Diego counties. The following information should be useful to hunters for archery and general seasons as well as any “additional hunt” within this geographic area. For more specific information or additional questions regarding this area, contact the following Department office(s):

- **Inland Deserts Region Office (Region 6), 3602 Inland Empire Boulevard, Suite C-220, Ontario, CA 91764 (909-484-0167)** encompassing Imperial, Inyo, Mono, Riverside and San Bernardino counties.

REGULATIONS

Laws and regulations are designed to conserve wildlife and to provide for an equitable distribution of game mammals. All hunters should read and be familiar with the current hunting regulations available online at: www.fgc.ca.gov/regulations/current/mammalregs.aspx. Remember, if you are hunting on private property you must obtain, and have in your possession written permission to hunt on private property. Hunter trespass laws are strictly enforced.

NONLEAD RESTRICTIONS

Following reports that the ingestion of lead projectiles and fragments associated with hunting may be contributing to high lead levels documented in wild condors, the Legislature passed the Ridley-Tree Condor Preservation Act into law (Fish and Game Code, Section 3004.5). Effective July 1, 2008, the Fish and Game Commission (FGC) adopted regulations (Sections 353 and 475, Title 14, CCR) which prohibit the use and possession of any lead projectiles/ammunition in firearms while taking, or attempting to take (hunting) any big game mammal (including deer), or non-game bird or mammal in most of the deer A Zone-South Unit 110 and all of deer zones D-7, D-8, D-9, D-10, D-11 and D-13.

Only FGC/Department certified projectiles/ammunition may be used or possessed when taking, or attempting to take big game mammals. Simply put, when hunting big game in these areas you may only use certified nonlead projectiles/ammunition in firearms (includes centerfire rifles, pistols and revolvers; shotguns and muzzle-loading rifles) legal for big game. In addition, while hunting big game in these areas hunters may not possess any lead projectiles/ammunition and a firearm capable of firing that lead projectile or ammunition.

In April 2015, the Fish and Game Commission adopted CDFW’s proposed regulations, which will implement the nonlead requirement in the following three phases:

NONLEAD AMMUNITION IMPLEMENTATION

- **Phase 1** – Effective July 1, 2015, nonlead ammunition will be required when taking Nelson bighorn sheep and all wildlife on CDFW lands.
- **Phase 2** – Effective July 1, 2016, nonlead shot will be required when taking upland game birds with a shotgun, except for dove, quail, snipe, and any game birds taken on licensed game bird clubs. In addition, nonlead shot will be required when using a shotgun to take resident small game mammals, furbearing mammals, nongame mammals, nongame birds, and any wildlife for depredation purposes.
- **Phase 3** – Effective July 1, 2019, nonlead ammunition will be required when taking any wildlife with a firearm anywhere in California.

Existing restrictions on the use of lead ammunition in the California condor range remain in effect while implementation proceeds.

For more information including a list of certified non-lead projectiles/ammunition that may be used in firearms for the taking of deer or other big game mammals; a map detailing the non-lead area; and links to other related topics go to the following web address: www.wildlife.ca.gov/Hunting/Nonlead-Ammunition

DEER HARVEST REPORTING

USED AND UNUSED TAGS MUST BE REPORTED

Accurate harvest information is a crucial element in developing population estimates, tag quotas, assessment of current hunt programs, and in the development of new opportunities. Regulations require all deer hunters to submit a harvest report card (online or by mail) to CDFW. Any deer hunter who does not submit a harvest report for each deer tag issued will be required to pay a non-reporting fee upon application for the next hunt season.

Successful hunters are reminded to immediately fill out both portions of the tag and permanently mark the date of kill; record the appropriate "Unit Number" where the deer was killed; attach the tag to the antlers, or ear, if antlerless; have the tag validated and countersigned; and return the completed report card portion.

WHEN TO REPORT

Successful deer hunters must report the take of a deer within 30 days of harvest or by January 31 – whichever date is first. Unsuccessful deer hunters (including hunters that received a tag but did not hunt) must report that they were unsuccessful or did not hunt by January 31.

HOW TO SUBMIT A REPORT

- Online – Both successful and unsuccessful hunters are encouraged to submit their harvest reports online. Hunters will be able to report their hunt results online via CDFW's Online License Service at www.wildlife.ca.gov/tagreporting. Hunters logging into the system will be able to view all of their tags requiring reports. Reporting through the Online License Service is easy, fast and convenient. When you report online, you receive instant confirmation that your harvest report card has been received and accepted. You must record the confirmation number in the space provided on the harvest report card and retain the harvest report card until March 1 of that year. Tags reported online must be surrendered to CDFW upon demand.
- By Mail – Any deer tag holder who does not submit a harvest report for their deer tag online, must return the report card portion to CDFW to the following address: CDFW – Wildlife Branch, PO Box 944209, Sacramento, CA 94299-0002.

ADDITIONAL DEER HUNTS

In 2016, there is one additional hunt opportunity within Zone D-19: Hunt J-14 (Riverside Apprentice Either-Sex Deer Hunt). Hunt J-14 is only in that portion of Zone D-19 within Riverside County. For general maps detailing the individual hunt area boundaries, go to the following link:

www.wildlife.ca.gov/Hunting/Deer#54774-zones--hunts

OBTAINING DEER TAGS

Beginning in late 2010, CDFW began implementation of the new Automated License Data System (ALDS). Under this computer data system, all licenses, stamps and tags are applied for, and issued through online Point-of-Sale terminals (IPOS) located at various CDFW license offices, over 1,400 license agents statewide or online at www.wildlife.ca.gov/Licensing. Under ALDS much less paperwork is required to apply for, and receive tags. In addition, licenses, tags and entry into the Big Game Drawing can all be accomplished with one trip to a license agent. Once your personal information is entered and stored in the database, the database controls and tracks what you have applied for, or been issued, as well as preference points. For more specific information on ALDS, application procedures and zone/hunt information, check out the current Big Game Hunting Digest available at most CDFW offices and license agents or online at: www.wildlife.ca.gov/Publications/Hunting-Digest.

For deer tag distribution purposes, zones and hunts are classified based upon the date in which the zone or hunt tag quota is filled in the prior year. The three tag categories include:

- 1) "**Premium**" zone/hunt tags are only issued through the Big Game Drawing using a First-Deer Tag Drawing Application, except that junior hunters may use their Second-Deer Tag Drawing Application to apply for Apprentice (J) Hunts. Hunters will lose all accumulated deer preference points if drawn for their first choice in the Big Game Drawing.;
- 2) "**Restricted**" zone/hunt tags are available upon application with a First-Deer Tag, or a Second-Deer Tag after August 1.; and
- 3) "**Unrestricted**" zone/hunt tags are available at any time using either a First- or Second-Deer Tag.

For Zone D-19 and associated hunts within the zone, the tag categories are as follows:

- 1) **Premium** Deer Hunts – **J14**
- 2) **Restricted** Deer Hunts – None

3) Unrestricted Deer Hunts – D19 and Archery Only (AO)

The deer hunting regulations specific to Zone D-19 (archery and general season) and any additional hunts are listed at the end of this sheet. To hunt deer in Zone D-19, hunters must possess a Zone D-19 deer tag which is valid during the archery or general season using the appropriate method of take. Additionally, Archery Only Tags (AO Tags) are valid during the Zone D-19 archery or general season using archery equipment only.

Typically, tags for additional deer hunts are in high demand and distributed through CDFW's Big Game Drawing held in June. To receive tags for many of these hunts, hunters must plan ahead and apply before the midnight **June 2, 2017 deadline**. Information regarding application procedures and restrictions, ALDS, zone and hunt seasons, prior year drawing and hunt statistics are contained in the 2017 Big Game Hunting Digest available at most CDFW offices, license agents and online at: www.wildlife.ca.gov/Publications/Hunting-Digest

HARVEST INFORMATION

Information on deer harvest for this area is available in tables contained on the Department's Deer Harvest Data page available on-line www.wildlife.ca.gov/Hunting/Deer#5477272-harvest-statistics. For the purpose of applying for hunts in a specific area, tables containing harvest success, antler class information, and Big Game Drawing statistics are the most useful in selecting a zone or hunt in which to apply. The harvest tables found on this web page may also contain more recent harvest analyses than information contained in the Big Game Hunting Digest due to the early production deadline dates for the publication.

LAND OWNERSHIP/PUBLIC LAND OPPORTUNITIES

The majority of land in Zone D-19 is public and administered by the San Bernardino National Forest (USFS) or the Bureau of Land Management (BLM). For information regarding these lands contact the following:

USFS Offices:

San Bernardino National Forest, 602 South Tippecanoe Avenue, San Bernardino, CA 92408-2607 (909-382-2600)

BLM Offices:

Barstow Field Office, 2601 Barstow Road, Barstow, CA 92311 (760-252-6000)
Palm Springs South Coast Field Office, 1201 Bird Center Dr., Palm Springs, CA 92262 (760-833-7100)

In Zone D-19 and other zones throughout California, additional deer hunting opportunities may exist on private property licensed through the Department's Private Lands Management Program (PLM). For more information on the PLM and to obtain a list of participating ranches, go to the following link:

www.wildlife.ca.gov/Hunting/PLM

Reminder: Much of the San Diego County portion of Zone D-19 is part of the Anza-Borrego Desert State Park and is closed to hunting, as is most of Imperial County. Two State Game Refuges (4D and 4G) and another state park in Riverside County are also closed to hunting. Located just south of the Interstate 10 and State Highway 111 split, the Mt. San Jacinto State Park and the San Jacinto Wilderness together, make up a portion of State Game Refuge 4D. State Game Refuge 4G is located just east of the 4D and is in the north-easternmost portion of the zone and includes the Santa Rosa Wilderness.

MAPS

For general maps detailing individual zone or additional deer hunt boundaries, go to the following Department web page: www.wildlife.ca.gov/Hunting/Deer#54774-zones--hunts

The most comprehensive maps of the area are the National Forest and BLM surface management maps. USFS maps are available locally at most USFS offices; by contacting the USFS Pacific Southwest Regional Office at: 1323 Club Drive, Vallejo, CA 94592 (707-562-8737); or ordered by phone (406-329-3024), fax (406-329-3030), or mail at USDA Forest Service, National Forest Store, P.O. Box 8268, Missoula, MT 59807; or on-line at: www.nationalforestmapstore.com/Default.asp

BLM surface management maps may also be useful. These maps can be purchased at local BLM district offices; the BLM at 2800 Cottage Way, Suite W-1834, Sacramento, CA 95825 (916-978-4400); or order on-line at: www.blm.gov/ca/st/en/info/iac/maps_pubroom

U.S. Geological Survey (USGS) topographic maps are very helpful, especially for topographic features that are not displayed on USFS or BLM maps. USGS maps may be available from many sporting goods, backpacking or engineering stores; by contacting the USGS directly at: Rocky Mountain Mapping Center, Branch of Information Services, Box 25286, Denver, CO 80225 (888-ASK-USGS); or on-line at: [store.usgs.gov/b2c_usgs/b2c/start/\(xcm=r3standardpitrex_prd\)/.do](http://store.usgs.gov/b2c_usgs/b2c/start/(xcm=r3standardpitrex_prd)/.do)

ACCESS/MAJOR ROADS

There are a number of roadways available to access Zone D-19. The zone is bounded by Interstate Highway 10 on the north, Highway 111 to the east, Highway 78 to the south, and Highway 79 to the west. These major highways lead to several smaller highways, USFS roads, and trails that go into the heart of Zone D-19 including: Highways 243 and 74, along with USFS roads 5S15, 4S10, and 6S13.

WEATHER CONDITIONS/TRAVEL TIPS

The weather in this region is highly variable so BE PREPARED. Warm days and cool nights are common during the Zone D-19 hunt season. Snow at higher elevations can occur at any time during the season. Hunters should be prepared with appropriate clothing and equipment for a variety of weather conditions.

Zone D-19 encompasses a large geographic area, and hunters are advised to assure gasoline tanks are full before entering back country. Terrain can be hard and flat, to steep and rocky. As is the case in every instance for all remote area travel, hunters should take along a shovel, serviceable spare tire, and lots of extra food and water. Four-wheel-drive vehicles are not generally required within the Zone D-19 hunt area, but should one get stuck, a considerable walk might be encountered. Be sure to use extra caution when driving off-road, and check with USFS or BLM regarding vehicle travel restrictions that may be in place. Note that only street-legal licensed vehicles are allowed within the majority of the zone, with green-sticker vehicles permitted only in certain locations and routes.

The Federal Government, through the USFS, requires a Forest Adventure Pass and Wilderness Pass in possession if you intend to park your vehicle and use the USFS public lands for any purpose. For more information call USFS at (909) 382-2600.

CAMPING

There are numerous campgrounds on public lands throughout the zone, many of which close later in the hunting season. During fire season, special regulations may apply, and it is always best to contact the local USFS (909-382-2600), BLM (760-252-6000), or California Department of Forestry and Fire Protection (CDF) (951-940-6900) office for the latest information.

Please, DO NOT camp or hunt for prolonged periods near water sources important to wildlife and livestock. Remaining for over 30 minutes and within 200 yards of an artificial water source on public lands within California; or any wildlife watering place such as waterholes, springs, seeps and man-made watering devices within the California Desert Conservation Area on BLM land is a Fish and Game violation (Title 14, Section 730). You can pack water, wildlife can't.

HERD CONDITIONS AND HABITATS

The deer population in Zone D-19 is considered stable to slightly declining, yet considerably below levels seen in the late 1960's and 1970's. As with most deer herds in California and other western states, the long-term population trend has been on a steady decline since the 1960's and 1970's. These long-term declines have been due to land management practices that have precluded fire, resulting in changes toward more mature and less diverse habitats, and reduced quality and quantity of deer habitats. Short-term fluctuations in deer populations are usually attributed to weather events that affect forage production.

The subspecies of deer inhabiting Zone D-19 are the Southern mule deer (western portions) and the Burro or Desert mule deer (eastern portions). Deer in Zone D-19 are considered resident deer. That is, their movement is up and down the slopes, they do not make long seasonal migrations.

The vegetation is highly varied throughout Zone D-19 ranging from chaparral and pine forests to high desert scrub habitats. Generally speaking, deer populations in this area respond favorably to vegetation disturbances that enhance brush species (wildfire and timber harvesting). Riparian areas (areas along watercourses), recently burned areas or clear cuts that have re-sprouted with brush are good areas to hunt. Typically, lower densities of deer are observed in the more densely forested areas or in older, more decadent brushlands.

HUNTING TIPS AND WHERE TO LOOK FOR DEER

Successful hunters often spend a considerable amount of time scouting pre-season, locating individual or groups of deer, recently used deer trails, and feeding and bedding areas. You may not see many deer from the roads in this area and generally the more successful hunters do more hiking to locate deer. Binoculars and/or spotting scopes can be very helpful for locating and identifying deer at greater distances. In general, attempt to hunt areas that are away from other activities such as concentrations of hunters, vehicles, and/or livestock.

Historically, areas where hunters have experienced success include: Rouse Ridge, Thomas Mountain, Beauty Mountain, Baldy Mountain, and Quinn Flat. Look for areas with recent wildfire or prescribed burn activity such as the Baldy Mountain area. Water is critical to deer survival and higher numbers of deer are found most often within close proximity to a water source.

For additional information about deer hunting in California, see CDFW's publication "Guide to Hunting Deer in California" at the following web site, under "Related Information":
www.wildlife.ca.gov/Hunting/Deer

**** **GOOD LUCK!** ****
