ZONE D7

2022 General Deer Hunting Information

(No Additional Hunts Scheduled)

GENERAL INFORMATION

This information sheet has been prepared to assist deer hunters applying for, or planning to hunt in, Zone D-7 located in portions of Fresno, Madera, Mariposa, and Tulare counties. The following information should be useful to hunters for archery and general seasons, as well as any “additional hunts” within this geographic area. For more specific information or additional questions regarding this area, contact the following Department office(s):

- Central Region Office (Region 4), 1234 E. Shaw Avenue, Fresno, CA 93710 (559-243-4005 ext. 151) encompassing Fresno, Kern, Kings, Madera, Mariposa, Merced, Monterey, San Benito, San Luis Obispo, Stanislaus, Tulare, and Tuolumne counties.

REGULATIONS

Laws and regulations are designed to conserve wildlife and to provide for an equitable distribution of game mammals. All hunters should read and be familiar with the Current Hunting Regulations. Remember, if you are hunting on private property you must obtain, and have in your possession, written permission to hunt on private property. Hunter trespass laws are strictly enforced.
NON-LEAD RESTRICTIONS

As of July 1, 2019, all hunters must use nonlead ammunition when taking any wildlife in California, except when hunting with a pellet rifle for approved species.

- CCR T14 250.1(d)(3) Effective July 1, 2019, it shall be unlawful to use, or possess with any firearm capable of firing, any projectile(s) not certified as nonlead when taking any wildlife for any purpose in this state.

- CCR T14 475(f) The take or attempted take of any nongame bird or nongame mammal with a firearm shall be in accordance with the use of nonlead projectiles and ammunition pursuant to Section 250.1 of these regulations.

For more information including a list of certified non-lead projectiles/ammunition that may be used in firearms for the taking of deer or other big game mammals, and links to other related topics, visit CDFW's Nonlead Ammunition in California web page.

DEER HARVEST REPORTING

USED AND UNUSED TAGS MUST BE REPORTED

Accurate harvest information is a crucial element in developing population estimates, tag quotas, assessment of current hunt programs, and in the development of new opportunities. Regulations require all deer hunters to submit a harvest report card (online or by mail) to CDFW. Any deer hunter who does not submit a harvest report for each deer tag issued will be required to pay a non-reporting fee upon application for the next hunt season.

Successful hunters are reminded to immediately fill out both portions of the tag and permanently mark the date of kill; record the appropriate "Unit Number" where the deer was killed; attach the tag to the antlers, or ear, if antlerless; have the tag validated and countersigned; and return the completed report card portion.
WHEN TO REPORT

Successful deer hunters must report the take of a deer within 30 days of harvest or by January 31 – whichever date is first. Unsuccessful deer hunters (including hunters that received a tag but did not hunt) must report that they were unsuccessful or did not hunt by January 31.

HOW TO SUBMIT A REPORT

- Online – Both successful and unsuccessful hunters are encouraged to submit their harvest reports online. Hunters will be able to report their hunt results online via CDFW's Online License Service. Hunters logging into the system will be able to view all of their tags requiring reports. Reporting through the Online License Service is easy, fast, and convenient. When you report online, you receive instant confirmation that your harvest report card has been received and accepted. You must record the confirmation number in the space provided on the harvest report card and retain the harvest report card until March 1 of that year. Tags reported online must be surrendered to CDFW upon demand.

- By Mail – Any deer tag holder who does not submit a harvest report for their deer tag online, must return the report card portion to CDFW to the following address: CDFW – Wildlife Branch, P.O. Box 944209, Sacramento, CA 94299-0002.

ADDITIONAL DEER HUNTS

There are no additional deer hunts scheduled in Zone D-7.

OBTAINING DEER TAGS

Beginning in late 2010, CDFW began implementation of the new Automated License Data System (ALDS). Under this computer data system, all licenses, stamps, and tags are applied for, and issued through Internet Point-of-Sale terminals (IPOS) located at various CDFW license offices, over 1,400 license agents statewide or online at CDFW's
Licenses and Permits page. Under ALDS, much less paperwork is required to apply for, and receive tags. In addition, licenses, tags, and entry into the Big Game Drawing can all be accomplished with one trip to a license agent. Once your personal information is entered and stored in the database, the database controls and tracks what you have applied for, or been issued, as well as preference points. For more specific information on ALDS, application procedures and zone/hunt information, check out the current Big Game Hunting Digest available online at CDFW's California Hunting Digest page.

For deer tag distribution purposes, zones and hunts are classified based upon the date in which the zone or hunt tag quota is filled in the prior year. The three tag categories include:

1) **Premium** zone/hunt tags are only issued through the Big Game Drawing using a First-Deer Tag Drawing Application, except that junior hunters may use their Second-Deer Tag Drawing Application to apply for Apprentice (J) Hunts. Hunters will lose all accumulated deer preference points if drawn for their first choice in the Big Game Drawing;

2) **Restricted** zone/hunt tags are available upon application with a First-Deer Tag, or a Second-Deer Tag after August 1.; and

3) **Unrestricted** zone/hunt tags are available at any time using either a First- or Second-Deer Tag.

For Zone D-7 and associated hunts within the zone, the tag categories are as follows:

1) **Premium** Deer Hunts – None
2) **Restricted** Deer Hunt – None
3) **Unrestricted** Deer Hunts – D7 and Archery Only (AO)

The deer hunting regulations specific to Zone D-7 (archery and general season) and any additional hunts are listed at the end of this sheet. To hunt deer in Zone D-7, hunters must possess a Zone D7 deer tag which is valid during the archery or general season using the appropriate method of take. Additionally, Archery Only Tags (AO
D7 Zone General Deer Hunt Information

Tags) are valid during the Zone D-7 archery or general season using archery equipment only.

Typically, tags for additional deer hunts are in high demand and distributed through CDFW’s Big Game Drawing held in June. To receive tags for many of these hunts, hunters must plan ahead and apply before the midnight June 2, 2022 deadline. Information regarding application procedures and restrictions, ALDS, zone and hunt seasons, prior year drawing and hunt statistics are contained in the 2022 Big Game Hunting Digest available online at CDFW's California Hunting Digest page.

HARVEST INFORMATION

Information on deer harvest for this area is available in tables contained on the Department's Deer Harvest Data page. For the purpose of applying for hunts in a specific area, tables containing harvest success, antler class information, and Big Game Drawing statistics are the most useful in selecting a zone or hunt in which to apply. The harvest tables found on this web page may also contain more recent harvest analyses than information contained in the Big Game Hunting Digest due to the early production deadline dates for the publication.

LAND OWNERSHIP/PUBLIC LAND OPPORTUNITIES

Zone D-7 contains a mixture of approximately 60% public and 40% private land. Remember, you must obtain, and have in your possession, written permission to hunt on private property. Hunter trespass laws are strictly enforced. The majority of public lands within Zone D-7 are administered by the Sierra National Forest (USFS). For information regarding these lands contact the following:

USFS Offices:

Sierra National Forest, 1600 Tollhouse Road, Clovis, CA 93611; (559-297-0706)
Wilderness lands have been established within several portions of the Sierra National Forest. The Ansel Adams, John Muir, Kaiser Lakes, and Dinkey Lakes Wilderness areas are accessible by hiking and pack stock. Public use of the wilderness is regulated by permit. Information on wilderness areas restrictions and Wilderness Permits may be obtained by contacting the Sierra National Forest.

**Reminder:** In the southeastern portion of Zone D-7, lands within the Kings Canyon National Park are closed to hunting. This area is well defined on the Sierra National Forest map.

In Zone D-7 and other zones throughout California, additional deer hunting opportunities may exist on private property licensed through the Department’s Private Lands Management Program (PLM). For more information on the PLM and to obtain a list of participating ranches, visit [CDFW's PLM web page](http://www.cdfw.ca.gov/plm).

### MAPS

For general maps detailing individual zone or additional deer hunt boundaries, visit [CDFW's Deer Hunting web page](http://www.cdfw.ca.gov/deerhunting).

The most comprehensive maps of the area are the National Forest maps. USFS maps are available locally at most USFS offices; by contacting the USFS Pacific Southwest Regional Office at: 1323 Club Drive, Vallejo, CA 94592 (707-562-8737); or ordered by phone (406-329-3024), fax (406-329-3030), or mail at USDA Forest Service, National Forest Store, P.O. Box 8268, Missoula, MT 59807; or online at the [National Forest Map Store website](http://www.fs.fed.us/nationalforestmaps/).

BLM surface management maps may also be useful. These maps can be purchased at local BLM district offices; the BLM at 2800 Cottage Way, Suite W-1834, Sacramento, CA 95825 (916-978-4400); or online at [BLM's California Maps web page](http://www.blm.gov/ca/st/en/main.html).

U.S. Geological Survey (USGS) topographic maps are very helpful, especially for topographic features that are not displayed on USFS or BLM maps. USGS maps may
be available from many sporting goods, backpacking or engineering stores; by contacting the USGS directly at: Rocky Mountain Mapping Center, Branch of Information Services, Box 25286, Denver, CO 80225 (888-ASK-USGS); or online at the USGS Store website.

**ACCESS/MAJOR ROADS**

Access to most public lands within Zone D-7 is very good. Major roads include: Madera County - State Highways 41 and 140, County Road 200 (National Scenic Byways Route) and Primary Forest routes 7, 10 and 81; Fresno County - State Highway 168, Watts Valley Road, Maxson Road, Trimmer Springs Road, and Forest Routes 40 and 80; and Mariposa County - State Highways 140, 41 and 49.

**WEATHER CONDITIONS/TRAVEL TIPS**

The weather in this region is highly variable, so BE PREPARED. Early in the season, temperatures are usually mild to hot with cold nights. Snow can occur anytime during the deer season, especially at higher elevations, and hunters should always be prepared for this possibility with appropriate clothing and equipment for a variety of weather conditions.

Zone D-7 covers a large geographic area. The terrain can be very steep and rugged and vegetation can be extremely dense. As you should do in all remote areas, hunters are urged to bring a shovel, a good spare tire, extra water, etc. Use care with any off-road vehicle and check with the BLM or USFS for rules and regulations regarding vehicle and travel restrictions in the area. Horses can be useful in some portions of Zone D-7. However, remember that it may be necessary to carry supplemental horse feed into the backcountry. Contact the local USFS and BLM office for more information regarding forage conditions for livestock.
CAMPING

There are numerous Forest Service campgrounds within Zone D-7. The developed campsites are shown on the Forest Service maps. Informal camping is allowed on Forest Service lands, but campfires permits are required. Permits may be obtained from any USFS, BLM, or California Department of Forestry (CDF) office. During fire season, special regulations may apply, and it is always best to contact the local USFS, BLM, or CDF office for the latest information.

Please, DO NOT camp or hunt for prolonged periods near water sources important to wildlife and livestock. Remaining for over 30 minutes and within 200 yards of an artificial water source, including guzzlers or horizontal wells on public lands within California, is a Fish and Game violation (Title 14, Section 730). You can pack water, wildlife can’t.

HERD CONDITIONS AND HABITATS

Population trends for the deer herds in Zone D-7 are generally upward, although populations are still considerably below those seen in the late 1960's and 1970's. As with most deer herds in California and other western states, the long-term population trend has been on a steady decline since the 1960’s and 1970’s. These long-term declines have been due to land management practices that have precluded fire, resulting in changes toward more mature and less diverse habitats, and reduced quality and quantity of deer habitats. Short-term fluctuations in deer populations are usually attributed to weather events that affect forage production.

The subspecies of deer inhabiting Zone D-7 is the California mule deer. The deer that occupy the higher elevations of Zone D-7 are migratory. They reside on their summer ranges until they are stimulated to migrate down slope to their wintering habitats. Habitat quality and quantity, temperature, day length, and weather conditions all play a part in determining when these deer will complete their fall migrations. Generally, from mid-October or later, any significant winter storm has the potential to cause some migratory deer to move from summer range to lower elevations. If those storms are
mild, some deer may delay in intermediate range, seeking acorns and other available fall forage. If severe enough, a single storm may result in the migration of a large percentage of the animals from the higher elevations, down slope to winter range habitat.

Deer are capable of sensing significant impending storms. They frequently migrate just prior to those storms, perhaps due to substantial changes in atmospheric pressure. Most of the areas considered summer range, particularly those areas between 5,000 and 8,000, are also good areas to hunt during early migrations. When these deer migrate, they frequently follow ridge tops and stream corridors. When driving along forest roads, look for freshly made trailimg off cut banks, adjacent to the roads.

The vegetation is highly varied throughout Zone D-7, ranging from oak-woodland, mixed and montane chaparral, hardwood, hardwood-conifer, aspen and dense conifer to alpine habitats. Generally speaking, deer populations in this area respond favorably to vegetation disturbances that enhance brush species (wildfire and timber harvesting). Riparian areas (areas along watercourses), recently burned areas, or clear cuts that have re-sprouted with brush are good areas to hunt. Areas where oaks are producing acorns may also attract deer. Typically, lower densities of deer are observed in the more densely forested areas or in older, more decadent brushlands.

**HUNTING TIPS AND WHERE TO LOOK FOR DEER**

Successful hunters often spend a considerable amount of time scouting pre-season, locating individual or groups of deer, recently used deer trails, and feeding and bedding areas. You may not see many deer from the roads in this area and, generally, the more successful hunters do more hiking to locate deer. Binoculars and/or spotting scopes can be very helpful for locating and identifying deer at greater distances. In general, attempt to hunt areas that are away from other activities such as concentrations of hunters, vehicles, and/or livestock.
Start looking in areas which have been burned in the last five to ten years or where the oak acorns are mature and abundant. Although meadows provide good forage for deer, especially does and fawns, bucks tend to utilize areas with better cover during hunting season: rougher terrain (ridges, etc.), denser vegetation, etc. After heavy snow storms, deer will rapidly move toward the winter range or hold in transitional areas. Look in areas with shrubs or preferred browse plants at intermediate elevations.

No one location is guaranteed to have deer on any given date; however, the following areas have historically been some of the more popular and productive areas to hunt: Fresno Dome, Granite Mountain, Sivels Mountain, Raymond Mountain, Whiskey Ridge, 77 Corral, Lion Point, Jackass Meadow, Crook Mountain and Long Ridge.

**SUMMER RANGE**

Summer range habitat for the migrant herds may be found anywhere from 5,000 feet to the Sierra Crest within Zone D-7. Areas include the Kaiser Wilderness, east to Mt. Givens; Tamarack Ridge; Kaiser Diggings; Mt. Tom; Hoffman Meadow and areas near Wishon and Courtwright Reservoirs; Woodchuck Country; Spanish, Hoffman, and Hall Mountains. These areas can be crowded with hunters, especially on opening weekend.

**INTERMEDIATE RANGE**

After winter storms, deer will begin to migrate through the following locations: west of the Kaiser Wilderness in the vicinity of Daulton Creek; Stump Springs Road and Mushroom Rock.

**WINTER RANGE**

Once significant amounts of snow have accumulated at higher elevations, deer may be found at the following locations: Patterson Mountain; Fence Meadow; Secata Ridge and Rodgers Ridge.

For additional information about deer hunting in California, see CDFW's publication "Guide to Hunting Deer in California" under “Related Information".
2022 ZONE AND ADDITIONAL HUNT SPECIFIC REGULATIONS

For more information, see the current Mammal Hunting Regulations.

§360. Deer.

Except as otherwise provided in Title 14, deer may be taken only as follows:

- (a) A, B, C, and D Zone Hunts.
  - (6) Zone D-7.
    - (A) Area: In those portions of Fresno, Madera, Mariposa and Tulare counties within a line beginning at the intersection of Highway 99 and the Madera-Merced county line; northeast along the Madera-Merced and Madera-Mariposa county lines to Highway 41 south of Westfall Station; north along Highway 41 to Yosemite National Park boundary; east along the park boundary to the Mono-Madera county line near Rodger Peak; south along the Inyo National Forest boundary (crest of the Ritter Range) to the junction of the Inyo National Forest boundary and Ashley Creek; east to Ashley Lake; northeast along Ashley Creek to the junction of King Creek; southeast along King Creek to its junction with the middle fork of the San Joaquin River; south and west along the middle fork of the San Joaquin River to the junction of the Inyo National Forest boundary; east along Fish Creek to its confluence with Deer Creek; north and east along Deer Creek to the upper crossing of the Deer Creek trail; north and east along the Deer Creek trail to the Inyo National Forest Boundary (the Sierra Crest); south along the Sierra crest and the Inyo National Forest boundary to Bishop Pass; west along the Dusy Basin Trail to the Middle Fork of the Kings River;
southwest and downstream along the Middle Fork of the Kings River to the junction of the Middle Fork and South Fork of the Kings River; southwest along the Kings River through Pine Flat Reservoir, Piedra and Reedley to Highway 99; north along Highway 99 to the point of beginning.

- (B) Season: The season in Zone D-7 shall open on the third Saturday in September and extend for 44 consecutive days.

- (C) Bag and Possession Limit: One buck, forked horn (See subsection 351(a)) or better, per tag.

- (D) Number of Tags: 9,000.

§361. Archery Deer Hunts.

- (a) Archery Hunting With General Deer Zone Tags.
Deer may be taken during the archery season only with archery equipment specified in Section 354 as follows:

  - (B) Zones D-6 through D-10.

    1. Area: As described in subsection 360(a)(5)(A) through (9)(A).

    2. Season: The archery season in zones D-6 through D-10 shall open on the third Saturday in August and extend for 23 days.

    3. Bag and Possession Limit: One buck, forked horn (see subsection 351(a)) or better per tag.

- (c) Archery Hunting with Archery Only Tags.
Deer may be taken only with archery equipment specified in Section 354, during the archery seasons and general seasons as follows:
(1) Number of Archery Only Tags Permitted. A person may obtain an archery only tag using a one-deer tag application and a second archery only tag using a second deer tag application.

(2) Zones in Which Archery Only Tags are Valid. An archery only tag is valid for hunt G-10, and during the archery season and general season in all zones except C-1 through C-4 and X-1 through X-12.

(3) Areas: As described in subsections 360(a) and (c).

(4) Seasons: The archery season and general seasons are provided in subsection 361(a) above and in subsections 360(a) and (c).

(5) Bag and Possession Limit: All bag and possession limits per zone are the same as those described in subsections 360(a) and (c).

(d) Hunting Area Limitations. Archers not in possession of an archery only tag may hunt only in the zone, zones, or areas for which they have a general tag or an area-specific archery tag. (Refer to subsection 361(c)(2) for zones in which archery only tags are valid).

(e) Crossbow Prohibition. Except as provided in subsection 354(j), crossbows may not be used during any archery season or during the general season when using an archery only tag.

**** GOOD LUCK! ****
