

Xantus's Murrelet (San Clemente Island)
10-50 pairs

Xantus's Murrelet (Santa Catalina Island)
25-75 pairs

Estimates are based on best available data from 1994-2000 surveys (HSU & USGS, unpubl. data).
Survey types: at-sea vocalization surveys, nesting habitat assessment, nest searches,
and at-sea captures/counts.

Map prepared 29 May 2002
