Mouth open-flowing
well-silt bottom
lower area.

To Hwy 50 crossing
bet. Tahoe Valley + Al
Tahoe - some gravel higher
no fish. Some willows
banks n.g. - erosion.

Divergent !!! - side channel
Lower Hwy 50 bridge
to upper " " "

- better gravel, banks
erosion, some willows
→ siltation, 2 old div.
dams. no prob. at present
time. Beaver Dam
about 1 mile above
Hwy bridge (lower) - partly
removed - would act
as barrier at lower
flow. no other serious

barriers - although some
debris.

Broder property - behind
Meyers - silt & bank erosion
Trees, willow - no serious
barriers. Dam (Scott) offers
no barrier at present flow
to R.T. - might hinder
Kohz. - esp. during lower
flows. good gravel

good spawning stream
except for siltation &
erosion. (Saw 10 fish in
Broder area this trip)
