INTRAOFFICE CORRESPONDENCE

DATE March 26, 1952

TO: Jack Fraser - 12 Sacramento Street - Placerville, California
FROM: L. H. Cloyd, Game Manager
SUBJECT: Beaver Dam

RECEIVED
MAR 28 1952

BU
PLACERVILLE
: 10N

Dear Jack:

It has been reported a beaver dam in the upper Truckee river is stopping the progress of spawning trout. This dam is just above the Scott's Dairy bridge.

Sec 9, T1214 R18E

The man that runs the new Shell Service Station across from Bal Bijou, in Bijou, was telling Judy Dunbar about the dam and seemed to be quite concerned. I would appreciate it if this could be checked by one of the Fish Conservation men.

Lawrence
L. H. Cloyd
Game Manager

LHC:dh

*Also check for gaffing of fishnets
Within the next couple of weeks. 4/1/52*

JAMES B. RICHARD

PLACERVILLE, CALIFORNIA

L. H. CLOYD, GAME MANAGER

APRIL 21, 1952

BEAVER DAM ON UPPER TRUCKEE RIVER

Dear Lawrence:

With reference to your letter of March 26, 1952, the above-mentioned dam was definitely not stopping fish from ascending the river. The dam has washed out and apparently the beavers have moved on as no fresh sign was seen.

Mr. King Monroe said he would try to locate them up stream and would let us know as to his results.

Yours very truly,

James B. Richard
Junior Aquatic Biologist

DATE APRIL 21, 1952

SUBJECT: BEAVER DAM - UPPER TRUCKEE RIVER
Sec. 9, T 12 N, R 18 E

About 1 mile above highway 50 bridge. Dam has washed out and definitely not blocking migrating fish. Beaver have apparently moved out. Quite a few cuttings around the dam site. No ^{fresh} signs seen.

JAMES B. RICHARD
Jr. Aquatic Biologist
