Mr. Don Kelly
Associate Fisheries Biologist
California Fish and Game Commission
1215 - 16th Street
Sacramento, California

Dear Mr. Kelly:

Enclosed is section from the Division of Highways Standard Specifications, covering fences, which you requested by phone today.

Highways has no set standard design of fences since the installations vary in so many cases to meet the wishes of the property owners from whom we have secured the right of way. In general, however, a four-wire barbed wire fence with either wood or steel posts is standard for stock fences. The contract prices for this type of fence run 35 cents to 80 cents, per linear foot, depending on the location, ground conditions, etc. A fair average would be about 50 cents per linear foot.

Very truly yours,

R. M. GILLIS
Deputy State Highway Engineer

Encls.
