D-J COORDINATION

Attention: Chester Woodhull

D. W. KELLEY

SURPLUS FUNDS - 1954-55 FISCAL YEAR

Difficulties have arisen that will prevent our spending any of the 1954-55 D-J funds on the Upper Truckee River Erosion Control Project. The Nevada Lumber Company of Tahoe Valley plans gravel removal operations in the stream. Until this matter is settled, we can go no further with our work there.

We still have over \$6,000 remaining unspent in our 1954-55 budget for F4D4. We wish to use \$3,700 of this money to purchase cube root. The cube root will be used in our chemical treatment program that is described on page 4 of the Plans, Specifications, and Estimates of the project.

Will you please send in the necessary project amendment.
