BEAVER DAMS ON THE UPPER TRUCKEE RIVER

Jack Hiehle tells me that you have reported some beaver dams blocking the Upper Truckee River. According to my knowledge of that stream, any beaver dams would not do much damage before April or May. If I do not hear from you we will plan to blow the dams out sometime in April. If I am wrong in assuming that the dams are doing no damage now and will do none until April, let me know and we will blow them out whenever you think best.
