Notes on Fishing Middle Valma Lake, El Dorado County, July 17 and 18, 1968

Three anglers on lake July 17. One had two 13" RT and lost a larger one.

Seven anglers were observed on lake July 18. My party of three hooked 5 RT 14" - 18" long. None were landed. Large rainbow appeared to be fairly numerous during midmorning watch. Fish were hooked using dry flies and spinners. This lake definitely supplies a trophy fishery.
