Attn: Stafford Lehr.

Dear Sir:

Enclosed is a letter addressed to me 10-10-91 which was quite informative to me regarding recent fishing conditions at Union Valley Reservoir. I have no further interest in it so decided you might want to review it for your information.

As far as this years of my fishing experience just a few comments:

Having fished the lake at least once a week from April to the closing of the road because of the disastrous fire I found the lake to be just a little better than 1991.

I found the Kokanees and averaged about  $1\frac{1}{2}$  fish per rod, <sup>in 4 to 5 hrs trolling</sup> all good size most 13" to 17", without the wedding Ring and corn I probably would have been shut out. (This lasted until Early Sept when most were below 100' on the fish locator.

Only a few boats those with very expensive boats, electronic gear and downriggers with more than 100' of downrigger scored.

Most days fishing no more than 1 to 6 boats on the water.

Tried fishing for trout using the same flasher and night crawlers in the same areas that

have been productive in previous years  
this year produced no action at all. Caught  
probably 5 trout all year these trout caught  
were good size could not identify type most  
looked like ~~or~~ combination of Browns or  
Brook or?

Early in the year some <sup>very</sup> small fish were  
taken still fishing where Jones Fork of  
Silver Creek enters the reservoir near the  
boat ramp. (Rainbows)

Never landed a Mackinaw although  
I heard a few were taken.

Caught one small Kokanee 2 days ago  
no other action with 2 rods (2 people) 4 hrs  
trolling (Probably spawning but where?)

I will keep fishing this lake next  
year hope we get some water and is a  
little more productive

no other boats on water

It is not necessary that you reply to  
this, However thought I would pass on to  
you my impressions of 1992

Truly Yours

Jack Thier

P.S.

No need to return the enclosed letter
