MT. RALSTON CLUB PLANS FOR 1943

When in Sacramento October 30th I attended the Mt. Ralston Club luncheon and learned from Joe Hill, Chairman of the Fish Planting Committee, that so far as they can tell at present they will have a full pack train available and men to operate it. They will, therefore, be able to carry out their program as in past years unless something changes their present plans.

It was stated that Upper Velma Lake will not need stocking next year as the Eastern Brook present therein were in very poor shape and extremely abundant. These facts were discovered at the annual outing of the club which was held in that locality.
