PACIFIC INSTITUTE
FOR STUDIES IN DEVELOPMENT, ENVIRONMENT, AND SECURITY

About the Pacific Institute

The Pacific Institute for Studies in Development, Environment, and Security is an independent, non-profit center created in 1987 to do research and policy analysis in the areas of environmental, sustainable development, and human development. The Institute conducts and distributes groundbreaking and useful research and policy suggestions on the interactions among these issues. Through its work, it contributes to equitable and social development, the reversal of environmental degradation, and the empowerment of people and communities.

About the Community Strategies for Sustainability and Justice Program

In 1996 the Pacific Institute launched the Community Strategies for Sustainability and Justice program to help identify ways to make communities more sustainable and just in a dynamic social environment. The program serves to: (1) identify the needs and interests of the communities necessary to build sustainable communities; (2) identify the policy options, strategies, and actions that can be taken to address the potential of communities to become sustainable and just.

California Water Transfers:

An Evaluation of the Economic Framework and A Spatial Analysis of the Potential Impacts

About the Authors

Santos Gomez is Senior Research Associate at the Institute. He works with farmers on equitable communities and environmental justice, public participation in environmental and natural resource policy, equity and social impacts of water transfers, and sustainability indicators across the rural communities. He received a law degree from the University of California at Davis and a Bachelor of Arts degree in Mathematical Economics from Pomona College.

Anna Steding is a Research Associate of the Institute. Her research is on the water transfers, rural in California and Middle Eastern water problems. She received a Bachelor of Science degree in Mathematics and Applied Science from the University of California at Los Angeles and a Master of Science in Environmental Engineering and Water from Stanford University. She is currently a Doctoral candidate at the University of California at San Diego where she is studying the relationship between water transfers and rural communities in California.

Acknowledgments

This water transfers project was funded by the Department of the San Francisco Bay Region, the Ford Foundation, the California Water Agency, the California State Water Resources Control Board, the University of California, and the California Water Resources Control Board. The authors would like to thank the following individuals for their assistance: Jimmie Johnson, the California Water Resources Control Board, and the California Water Resources Control Board. The authors would also like to thank the following individuals for their assistance: Jimmie Johnson, the California Water Resources Control Board, and the California Water Resources Control Board.

Table of Contents

LISTS OF TABLES, FIGURES, AND MAPS	v
EXECUTIVE SUMMARY.....	E-1
I. INTRODUCTION	1
II. HISTORY AND ECONOMIC UNDERPINNINGS OF WATER TRANSFERS	3
A. THE ORIGINS OF WATER AS A COMMODITY.....	3
B. WATER MARKETS: THE THEORETICAL ECONOMIC UNDERPINNINGS	3
1. Feasibility of Market Conditions	5
2. Desirability of Market Objectives: Is There More Than Economic Efficiency?	6
III. WATER TRANSFER DECISIONS AND IMPACTS: A BRIEF INTRODUCTION	7
IV. MORE ON WATER TRANSFER IMPACTS: THE SPATIAL ANALYSIS	9
A. INTRODUCTION TO PROJECT: WHERE, WHAT, WHEN, AND HOW	9
B. SPATIAL ANALYSIS OF PROJECT FINDINGS	9
1. Where Will Water Be Transferred From?	9
2. What Will Be the Impacts of Those Transfers?	26
3. Significance of Project Findings	39
V. POLICY RECOMMENDATIONS FOR AGRICULTURE TO URBAN WATER TRANSFERS	45
A. PRINCIPLES TO AVOID IMPACTS OF WATER TRANSFERS	45
1. Water Management	45
2. Hydrology	46
3. Land Use	46
4. Aquatic Habitat, Fisheries, Riparian Vegetation, and Wildlife	47
5. Social and Cultural Assets and Community Values	47
6. Local Economies	47
7. Institutions and Legal and Regulatory Regimes	48
8. Community and Civic Participation	49
9. Cumulative Impacts	50
B. INCLUSIVE AND PARTICIPATORY WATER TRANSFERS POLICY	50
C. DEMONSTRATION OF EFFICIENT USE OF EXISTING SUPPLIES	50
D. MONITORING AND ASSURANCES	52
VI. CONCLUSION	53
REFERENCES	55

LIST OF TABLES

TABLE 1. SOME LONG-TERM WATER TRANSFERS IN CALIFORNIA	4
TABLE 2. SUMMARY OF DATA USED IN PROJECT	11
TABLE 3. SURFACE WATER DELIVERIES IN ACRE-FEET, 1986 TO 1993	14
TABLE 4. RELIABILITY OF STATE WATER AND CENTRAL VALLEY PROJECT SUPPLIES, 1990 TO 1994	16
TABLE 5. AVERAGE COST OF SURFACE WATER DELIVERIES, 1993	18
TABLE 6. CROP VALUE: DOLLARS PER ACRE-FOOT, 1990 AND 1995	21
TABLE 7. CROP ACREAGE BY COUNTY AND CROP TYPE FOR TWO CONSECUTIVE SURVEY YEARS	23
TABLE 8. FRACTION OF CIVILIAN LABOR FORCE EMPLOYED IN AGRICULTURE, 1985 TO 1996	27
TABLE 9. UNEMPLOYMENT RATE, 1985 TO 1996	31
