HYDROLOGY HANDBOOK

PREPARED BY
THE COMMITTEE ON HYDROLOGY
OF THE
HYDRAULICS DIVISION
ADOPTED JANUARY 17, 1949

HEADQUARTERS OF THE SOCIETY
33 WEST 39TH ST., NEW YORK 18, N. Y.

COPYRIGHT 1949, BY THE AMERICAN SOCIETY OF CIVIL ENGINEERS
PRINTED IN THE UNITED STATES OF AMERICA
REPRINTED, 1952

HYDROLOGY HANDBOOK

PREPARED BY
THE HYDROLOGY COMMITTEE
OF THE
HYDRAULICS DIVISION

HYDROLOGY COMMITTEE

Merrill Bernard, *Chairman*

Donald M. Baker
S. W. Jens
W. B. Langbein
Finley B. Laverty

Adolph F. Meyer
W. W. Horner *
W. G. Hoyt *
Thorndike Saville *

SUBCOMMITTEES

PRECIPITATION

Merrill Bernard, *Chairman*
W. C. Ackermann
John A. Adams, Jr.
L. L. Harrold
Phillip Light
Robert L. Lowry, Jr.
T. J. Nordenson

INFILTRATION

S. W. Jens, *Chairman*
Howard L. Cook
R. A. Hertzler
R. E. Horton **
G. W. Musgrave †

RUNOFF

W. B. Langbein, *Chairman*
C. F. Izzard
S. W. Jens
R. K. Linsley, Jr.
Emil P. Schuleen
H. C. Troxell

EVAPORATION AND TRANSPIRATION

Adolph F. Meyer, *Chairman*
Harry F. Blaney
N. W. Cummings †
Carl Rohwer
C. W. Thornthwaite †
Arthur A. Young **

GROUND WATER STORAGE

Donald M. Baker, *Chairman*
H. H. Cooper, Jr.
George B. Gleason
R. M. Leggette
Robert O. Thomas

* Completed terms of membership.

** Deceased.

† Not a member of the Society.

CONTENTS

<i>Subsection</i>	<i>Page</i>
Historical Summary	VIII
Foreword	
1. Introduction	1
2. Hydrologic Cycle	1
CHAPTER 1.—PRECIPITATION	
1. Precipitation in the Engineering Problem	5
2. Synoptic Weather Maps and Upper Air Charts	5
3. Engineering Significance of Storm Types	7
4. Precautions in the Application of Precipitation Data	9
5. Data Processing	12
a. Adjustment and Interpolation of Precipitation Records	12
b. Method for Converting Rainfall Depth to Intensity	15
c. Procedure for Development of Rainfall Intensity-Duration-Frequency Relations	17
d. Procedure for Development of Rainfall Depth-Area Relations	19
(1) Mass Curves of Rainfall	22
(2) Depth-Area Curves	23
6. Precipitation Deficiency	24
a. Processing Rainfall Deficiency Data	24
b. Depth-Frequency Relations	25
c. Residual Mass Curves	26
7. Precipitation in the Form of Snow	27
a. Method of Sampling as Snowfall	27
b. Method of Sampling in the Snow Pack	28
c. Snow as a Contribution to Flood Flow	29
d. Snow as a Source of Water Supply	29
e. The Degree-Day Procedure for Determining Snow Melt	30
CHAPTER 2.—INFILTRATION	
1. General Description of the Process	33
a. Rainfall Characteristics	34
b. Soil Characteristics	34
c. Condition of the Soil Mass	35
d. Soil Surface Condition	35
e. Cover	37
f. Soil Moisture	38
g. Other Factors Affecting the Rate of Infiltration	39

<i>Subsection</i>	<i>Page</i>
2. Methods of Collecting Basic Data	40
<i>a.</i> Plots and Watersheds	40
<i>b.</i> Infiltrimeters	41
3. Derivation and Expression of Infiltration Data	42
<i>a.</i> Kinds of Infiltration Curves	43
<i>b.</i> Infiltration Indices	45
4. Infiltration Curves and Indices	47
<i>a.</i> Infiltration Curves	47
<i>b.</i> Forest Cover	50
<i>c.</i> Grass Cover	50
<i>d.</i> Close Growing Crops	51
<i>e.</i> Row Crops	51
5. Shape of Standard Curves	52
<i>a.</i> Effect of Season	52
<i>b.</i> Effect of Moisture	53
<i>c.</i> Infiltration Indices	53
6. Infiltration as a Factor in the Phenomenon of Runoff	54
<i>a.</i> The Mechanics of Surface Runoff	55
<i>b.</i> Determination of Surface Runoff Through Use of Infiltration Curves	56
<i>c.</i> The Use of Infiltration Curves	56
<i>d.</i> Effect of Antecedent Conditions	57
<i>e.</i> Variation of Infiltration Capacity Under Low Intensities	58
<i>f.</i> Recovery of Infiltration Capacity	58
<i>g.</i> Effect of Season	58
<i>h.</i> Surface-Storage Effects	59
7. The Use of Indices	59
<i>a.</i> Use of the ϕ Index	59
<i>b.</i> Use of the f_{avg} and W Indices	59
<i>c.</i> Use of the W_{min} Index	59
<i>d.</i> Choice of Indices	59
8. Illustrative Applications	60
<i>a.</i> Infiltration in the Evaluation of the Effect of Land Treatment on Floods	60
<i>b.</i> Infiltration in the Conservation of Water by Spreading and Stream Bed Percolation and Return Flow of Irrigation Water	61
<i>c.</i> Urban and Airport Drainage	62

CHAPTER 3.—RUNOFF

1. The Engineer's Concern with Runoff	65
2. Characteristics of Runoff	65
<i>a.</i> Seasonal Fluctuations	66
<i>b.</i> Long-term Variations	68

<i>Subsection</i>	<i>Page</i>
<i>c.</i> Characteristic Features of the Hydrograph	70
<i>d.</i> Normal Ground Water Depletion Curve	72
3. Stream Gaging	73
<i>a.</i> Units	75
4. Sources of Basic Data	76
5. Extending Stream Flow Records	78
<i>a.</i> Extending a Record in Time	78
(1) Comparisons with Rainfall	78
<i>b.</i> Extending a Record in Place	79
6. Water Utilization and Conservation	80
<i>a.</i> Mass Curve	81
<i>b.</i> Residual Mass Tabulations to Determine Storage Required for Stream Flow Regulation	81
<i>c.</i> Duration Curve	83
<i>d.</i> Minimum Flow	83
<i>e.</i> Irrigation	86
<i>f.</i> Farm Ponds	87
<i>g.</i> Sedimentation	88
<i>h.</i> Chemical Quality of Water	89
7. Floods	89
<i>a.</i> Overland Flow	92
<i>b.</i> Municipal Drainage	97
<i>c.</i> Flood Frequency	101
(1) Plotting Procedures; Annual Flood Peaks	102
(2) Plotting Procedures; Partial-Duration Series	104
<i>d.</i> The Unit Hydrograph	105
<i>e.</i> Drainage Behind Levees	113
<i>f.</i> Flood Routing	115

CHAPTER 4.—EVAPORATION AND TRANSPIRATION

1. Introduction	119
2. Evaporation from Water Areas	119
<i>a.</i> Evaporation Defined	119
<i>b.</i> Effect of Temperature	119
<i>c.</i> Effect of Relative Humidity	120
<i>d.</i> Effect of Wind Velocity	122
<i>e.</i> Effect of Barometric Pressure	123
<i>f.</i> Effect of Salinity	123
3. Evaporation from Pans	123
<i>a.</i> The Weather Bureau Pan	123
<i>b.</i> The Sunken Screened Pan	123
<i>c.</i> The Bureau of Plant Industry Pan	124
<i>d.</i> The Floating Pan	124
<i>e.</i> The Colorado Sunken Pan	124

<i>Subsection</i>	<i>Page</i>
<i>f.</i> Atmometers.....	124
<i>g.</i> Conclusions.....	124
4. Sources of Evaporation Data.....	125
<i>a.</i> Pan Evaporation Records.....	125
<i>b.</i> Evaporation Maps.....	125
5. Evaporation Formulas.....	125
6. Estimating Reservoir Evaporation for a Given Locality.....	126
<i>a.</i> From Pan Records.....	126
<i>b.</i> From Evaporation Maps.....	126
<i>c.</i> From Solar Radiation.....	127
<i>d.</i> Supplemental Observations.....	128
7. Rate of Evaporation from Land Areas.....	128
8. Evaporation Opportunity.....	129
<i>a.</i> Interception.....	129
<i>b.</i> Capillary Capacity of Soils.....	130
<i>c.</i> Capillary Uplift.....	130
<i>d.</i> Dust Mulches.....	131
<i>e.</i> Evaporation from Bare Soil.....	131
<i>f.</i> Graph of Land Evaporation.....	131
<i>g.</i> Evaporation from Snow.....	132
9. Transpiration.....	133
<i>a.</i> Factors Influencing Transpiration.....	134
<i>b.</i> Effect of Soil Moisture.....	134
<i>c.</i> Transpiration Ratio.....	135
<i>d.</i> Quantitative Transpiration Data.....	135
10. Evapo-Transpiration or Consumptive Use.....	136
<i>a.</i> From Soil Moisture Determinations.....	136
<i>b.</i> From Tank or Lysimeter Experiments.....	137
<i>c.</i> From Ground Water Fluctuations.....	137
<i>d.</i> From Evaporation Pan Records.....	138
<i>e.</i> From Climatological Data.....	138
<i>f.</i> From Vapor Pressure Gradients.....	139
<i>g.</i> From Aerological Observations.....	139
11. Quantitative Data on Consumptive Use.....	139

CHAPTER 5.—GROUND WATER STORAGE

1. Introduction.....	141
2. Development of Ground Water Hydrology.....	141
3. Ground Water Provinces in the United States.....	142
<i>a.</i> Atlantic and Gulf Coastal Plain Region.....	142
<i>b.</i> East Central Region of Paleozoic and Other Old Rocks.....	142
<i>c.</i> Great Plains Region.....	144
<i>d.</i> Western Mountain Region.....	144

<i>Subsection</i>	<i>Page</i>
4. Source of Ground Water	144
5. Ground Water Zones	145
<i>a.</i> Zone of Aeration	145
<i>b.</i> Zone of Saturation	146
6. Occurrence of Ground Water	147
<i>a.</i> Types of Rock	147
<i>b.</i> Interstices	148
7. Water Yielding Properties of Rock	149
<i>a.</i> Porosity	149
<i>b.</i> Specific Yield and Specific Retention	151
8. Movement of Ground Water	152
<i>a.</i> Zone of Aeration	152
<i>b.</i> Zone of Saturation	152
<i>c.</i> Velocity of Flow	152
<i>d.</i> Coefficient of Permeability	154
9. Ground Water Reservoirs	154
<i>a.</i> Free Ground Water Reservoirs	155
<i>b.</i> Artesian Ground Water Reservoirs	155
<i>c.</i> Change in Storage—Free Ground Water Reservoirs	156
<i>d.</i> Relation Between Recharge and Discharge	158
<i>e.</i> Recharge of Ground Water Reservoirs	159
<i>f.</i> Discharge of Ground Water Reservoirs	163
<i>g.</i> Reservoirs in Limestone	164
<i>h.</i> Reservoirs in Volcanic Formations	165
10. Safe Yield of Ground Water Reservoirs	165
<i>a.</i> Criteria for Determining Safe Yield	165
<i>b.</i> Factors Affecting Safe Yield	166
<i>c.</i> Procedure in Determining Safe Yield—General	166
<i>d.</i> Determination of Safe Yield from Fluctuations of the Water Table	167
<i>e.</i> Method Used to Determine Safe Yield of Raymond Basin, California	168
11. Basic Ground Water Data	169
12. Hydraulics of Ground Water Reservoirs	169
BIBLIOGRAPHY	173
