Site Overview

Photos are representative of the North Coast Region and may not be within this MPA.

What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

What is an SMCA?

An **SMCA** is a type of MPA that protects resources by allowing for only specific types of recreational and/or commercial take to occur. (*Area restrictions are defined in [Title 14, Section 632\(a\)\(1\)\(C\)](#)*).

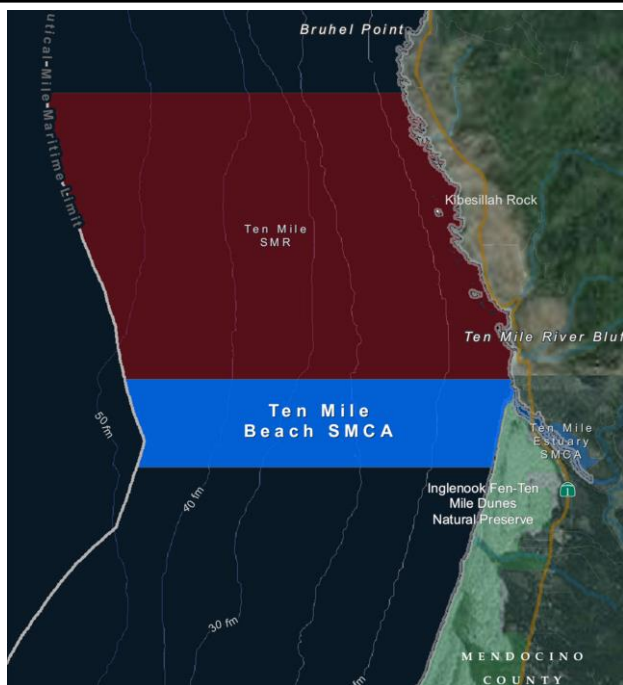

Ten Mile Beach SMCA Key Habitats

- **Beaches:** 1.0 miles
- **Rocky shores:** 0.05 miles
- **Sand (all depths):** 3.16 square miles
- **Unidentified (all depths):** 0.37 square miles

Ten Mile Beach SMCA Overview

- **MPA size:** 3.54 square miles
- **Depth range:** 0 to 288 feet
- **Along-shore span (shoreline):** 0.9 miles

Where is Ten Mile Beach SMCA?

Boundaries and Regulations

Boundary: This area is bounded by the mean high tide and straight lines connecting the following points in the order listed except where noted:

- 39° 33.300' N. lat. 123° 46.015' W. long.;
- 39° 33.300' N. lat. 123° 50.559' W. long.; thence southward along the three nautical mile offshore boundary to
- 39° 32.500' N. lat. 123° 50.418' W. long.;
- 39° 32.500' N. lat. 123° 46.242' W. long.; thence northward along the mean high tide line onshore boundary to
- 39° 33.098' N. lat. 123° 46.003' W. long.;
- 39° 33.199' N. lat. 123° 45.966' W. long.

Only the following take is allowed in Ten Mile Beach SMCA:

1. The recreational take of Dungeness crab by trap, hoop net or hand.
2. The commercial take of Dungeness crab by trap.
3. Certain federally recognized tribes are exempt from the area and take regulations for this MPA. For information regarding tribal take, please see California Code of Regulations Title 14, subsection 632(a)(11).

Ten Mile Beach State Marine Conservation Area

How and Why Ten Mile Beach was Chosen for an SMCA

MPAs were designed through a collaborative, regional public process by a cross-interest regional stakeholder group (RSG). Using scientific criteria, public input and local resource knowledge the RSG developed MPA proposals. RSG proposals included site specific rationale (why the site should be an MPA-*included below*), the classification (type of MPA), boundaries, and regulations. Final MPA proposals were sent to the California Fish and Game Commission (Commission) for their adoption process. Ten Mile Beach SMCA was adopted by the Commission in 2012.

North Coast RSG Identified Rationale for Ten Mile Beach SMCA:

This SMCA adds protection for soft bottom habitat adjacent to Ten Mile SMR to the north, and connects the estuarine MPA to the offshore SMR. A number of socioeconomic impacts were considered when designing this MPA, including an important crab fishing area just within the 10 Mile Safety Zone from Noyo Harbor.

Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.
