

SELENIUM IN WATER,  
SEDIMENT, AND  
TRANSPLANTED CORBICULA  
IN IRRIGATION DRAINAGE  
AND WILDLIFE USE OF  
DRAINS IN THE  
IMPERIAL VALLEY, CALIFORNIA  
1994-1995

## Appendices:

A. Analytical results from subsurface drainwater samples collected from gravity tile outlets and sumps during August 1994 through January 1995, Imperial Valley, California .....	54
B. Field Measurements and ancillary information from 820 subsurface drainwater sites –gravity tile outlets and sumps sampled during August 1994 through January 1995, Imperial Valley, California .....	62
C. Analytical results from bottom sediment and water column samples collected from surface drains during August 1994, Imperial Valley, California .....	82

## Biological Survey Appendix

A - Map of the Imperial Valley, California, showing biological survey sites .....	86
B - Second-round benthic invertebrate sampling results, four surface drains, Imperial Valley, California .....	87
C - Abundance of bird species in surface drains, Imperial Valley, California .....	89
D - Scientific names of organisms identified in surface drains, Imperial Valley, California .....	91

## TABLES

1. Summary of selected analytical results for subsurface drainwater samples.....	11
2. Selected results for sites having low Se/Cl ratios.....	12
3. Specific conductance and selenium in crops.....	13
4. Concentrations of selected constituents in surface drainwater.....	17
5. Changes in concentrations of selected constituents.....	22
6. Surface drains selected for biological surveys.....	26
7. Percent of different habitat types occurring at the drains.....	29
8. Comparison of bird use at ten agricultural drains.....	29
9. Sensitive status species found at agricultural drains.....	30
10. Bird species observed at only one drain.....	30
11. Average number of bird species and individuals at stops containing dominant drain vegetation.....	31
12. Correlation between bird species and presence or absence of vegetation species.....	32
13. Abundance of Burrowing Owls and percent bare ground cover at the study drains.....	33
14. Comparison of reptile use at ten agricultural drains.....	34
15. Attributes of benthic and water column invertebrate communities.....	35
16. Selenium concentrations in Corbicula placed at selected sites in the Imperial Valley..	41

# Figures

1. Map showing study area .....	3
2. Graph of Specific conductance versus dissolved solids in gravity tiles and sumps, Imperial Valley, California .....	11
3. Graph of selenium versus dissolved solids in gravity tiles and sumps, Imperial Valley, California .....	12
4. Specific conductance versus discharge in surface drains, Imperial Valley, California....	17
5. Selenium versus chloride in surface drains, Imperial Valley, California .....	18
6. Selenium in water versus selenium in bottom sediments of surface drains, Imperial Valley, California .....	18
7. Selenium versus bed material % less than 0.062mm in surface drains, Imperial Valley, California .....	19
8. Graph showing vegetation percent cover by drain, Imperial Valley, California .....	28
9. Diagram showing drain ecology, Imperial Valley, California .....	36
