Table of Contents

Executive Summary	xiii	6. An Overview of Water-Efficiency Potential in the CII Sector	77
The Success Stories	xix	Introduction	77
Introduction	1	Significant Water-Efficiency Potential	77
1. Marin Municipal Water District's Innovative Integrated Resource Management Program	11	Building on Past Water-Efficiency Improvements	78
Introduction	11	Tapping the Potential	80
Background	11	Conclusions/Lessons Learned	82
The Four-Pronged IRMP	14	7. Assessing Commercial, Industrial, and Institutional Water-Efficiency Potential: The MWD Audit Program	85
Conclusions/Lessons Learned	24	Introduction	85
2. Promoting Conservation with Irvine Ranch Water District's Ascending Block Rate Structure	27	Background	85
Introduction	27	The Program	86
Background	27	Evaluation of Success	90
The Program	28	Conclusions/Lessons Learned	95
Evaluation of Success	31	8. Increasing Institutional Water-Use Efficiencies: University of California, Santa Barbara Program	99
Conclusions/Lessons Learned	32	Introduction	99
3. Effective Public Participation in the Rate Setting Process: LADWP Blue Ribbon Committee on Rates	37	Background	99
Introduction	37	The Program	101
Background	37	Evaluation of Success	103
The Project	38	Conclusions/Lessons Learned	105
Evaluation of Success	47	9. Increasing Industrial Water-Use Efficiencies: Naval Aviation Depot, North Island	107
Conclusions/Lessons Learned	48	Introduction	107
4. Reducing Water Use in Residential, Industrial, and Municipal Landscapes	49	Background	107
Introduction	49	The Project: Focusing on Water Use	108
Background	49	Evaluation of Success: Dramatic Water Savings Achieved	112
The Projects	50	Conclusions/Lessons Learned	112
North Marin Water District	50	10. Reducing Water Use and Solving Wastewater Problems with Membrane Filtration: Oberti Olives	113
Santa Clara Valley Water District	57	Introduction	113
Irvine Ranch Water District	60	The Project	115
Conclusions/Lessons Learned	64	Evaluation of Success	116
5. Community-Agency Partnerships Save Water and Revitalize Communities through ULFT Programs	69	Conclusions/Lessons Learned	117
Introduction	69	11. An Overview to Water Recycling in California	121
Background	69	Introduction	121
The Projects: Water Savings and Community Benefits	71	Recycled Water Use in California	123
Conclusions/Lessons Learned	74	Evaluation of Success: Barriers to Water Recycling	123
		Conclusions/Lessons Learned	126

12. Using Recycled Water in Urban Settings: West Basin Recycling Project and South Bay Water Recycling Program 127	The Project: Implementing the Agreements. 189
Introduction 127	Evaluation of Success 193
The Projects 127	Conclusions/Lessons Learned 196
West Basin Recycling Project 127	18. Winter-Flooded Fields Benefit Farmers and Wildlife 199
South Bay Water Recycling Program 132	Introduction 199
Conclusions/Lessons Learned 138	The Ricelands Habitat Partnership. 204
13. Using Recycled Water for Agricultural Irriga- tion: City of Visalia and City of Santa Rosa 141	Evaluation of Success 205
Introduction 141	Conclusions/Lessons Learned 210
The Projects 141	19. Reviving Central Valley Wetlands: Upper Beach Lake Wildlife Enhancement and the Beach Lake Mitigation Bank 215
City of Visalia 141	Introduction 215
City of Santa Rosa 143	Background 215
Evaluation of Success 147	The Projects 217
Conclusions/Lessons Learned 148	Upper Beach Lake Wildlife Enhancement 217
14. Crop Shifting in California: Increasing Farmer Revenue, Decreasing Farm Water Use. 149	Beach Lake Mitigation Bank. 220
Introduction 149	What Makes the Beach Lake Projects Successful? 225
Background: Water Savings from Crop Switching 150	Conclusions/Lessons Learned 226
Historical Crop Shifts Statewide 152	20. Restoring Riparian Forests and Natural Flood Regimes: The Cosumnes River Pre- serve 229
Historical Crop Shifts in Regions or Water Districts. 155	Introduction 229
Implications for Water Use	Background 229
Productivity 159	The Cosumnes River Preserve 233
Factors Leading to Crop Switching 162	Why is the Cosumnes River Preserve a Success? 237
Conclusions 162	Conclusions/Lessons Learned 237
15. Converting to Efficient Drip Irrigation: Underwood Ranches and High Rise Farms. 165	21. Improving Passage for Spring-Run Salmon: Cooperative Efforts on Deer, Mill, and Butte Creeks 241
Introduction 165	Introduction 241
Background 165	The Projects 243
The Projects 172	Deer and Mill Creeks 243
Evaluation of Success 173	Butte Creek. 248
Conclusions/Lessons Learned 174	Conclusions/Lessons Learned 252
16. The Power of Good Information: The Cali- fornia Irrigation Management Information System (CIMIS) 179	22. Watershed Management "Above the Dams": Feather River Coordinated Resource Man- agement. 255
Introduction 179	Introduction 255
Background 179	Background 255
Evaluation of Success 183	The Project: Feather River Coordinated Resource Management Group 257
Conclusions/Lessons Learned 184	Why is the FRCRM a Success? 264
17. Improving Water Quality Through Reducing the Use of Herbicides on Rice: An Effective Collaboration Between Growers and Public Agencies 187	Conclusions/Lessons Learned 265
Introduction 187	
Background 187	

<p>23. Working for Healthy Urban Watershed Communities: Santa Ana River Basin and Napa River Watershed. 269</p> <p style="padding-left: 20px;">Introduction 269</p> <p style="padding-left: 20px;">The Projects 269</p> <p style="padding-left: 20px;">Santa Ana Watershed Project Authority. 269</p> <p style="padding-left: 20px;">Napa River Watershed Management . . 275</p> <p style="padding-left: 20px;">Why Are These Projects Successful? . 280</p> <p style="padding-left: 20px;">Conclusions/Lessons Learned 280</p> <p>24. Restoring Urban Streams Offers Social, Environmental, and Economic Benefits. 283</p> <p style="padding-left: 20px;">Introduction 283</p> <p style="padding-left: 20px;">The Projects 286</p> <p style="padding-left: 20px;">San Luis Obispo Creek 286</p> <p style="padding-left: 20px;">Wildcat Creek: Richmond and San Pablo. 291</p> <p style="padding-left: 20px;">Strawberry Creek: Berkeley 296</p> <p style="padding-left: 20px;">Conclusions/Lessons Learned 302</p> <p>25. Finding Mono Basin Replacement Water: Mono Lake Committee and Los Angeles Department of Water and Power. 305</p> <p style="padding-left: 20px;">Introduction 305</p> <p style="padding-left: 20px;">Background. 305</p> <p style="padding-left: 20px;">The Water Replacement Program. . . . 309</p> <p style="padding-left: 20px;">Evaluation of Success 313</p> <p style="padding-left: 20px;">Conclusions/Lessons Learned 313</p> <p>26. Improving Water Management through Groundwater Banking: Bakersfield 2800 Acre Recharge Facility and Semitropic Groundwater Banking Program. 317</p> <p style="padding-left: 20px;">Introduction 317</p> <p style="padding-left: 20px;">The Projects 321</p> <p style="padding-left: 20px;">Bakersfield 2800 Recharge Facility . . . 321</p> <p style="padding-left: 20px;">Semitropic Grounwater Banking Program 327</p> <p style="padding-left: 20px;">Conclusions/Lessons Learned 333</p> <p>27. Comprehensive Groundwater Management: Orange County Water District and West and Central Basins 335</p> <p style="padding-left: 20px;">Introduction to Groundwater Management in California 335</p> <p style="padding-left: 20px;">Orange County Water District 338</p> <p style="padding-left: 20px;">Central and West Coast Basins 348</p> <p style="padding-left: 20px;">Conclusions/Lessons Learned 357</p> <p>28. Legal Protection for Rivers: the State and Federal Wild and Scenic Rivers Acts 359</p> <p style="padding-left: 20px;">Introduction 359</p> <p style="padding-left: 20px;">Background. 359</p> <p style="padding-left: 20px;">National Wild and Scenic River Protection for California Rivers 362</p>	<p>Wild and Scenic Issues 367</p> <p>Future of the Act: Expanded Protection 370</p> <p>Conclusions/Lessons Learned 372</p>
