

Point Arena State Marine Conservation Area

North Central California Marine Protected Areas (MPAs), *Established May 2010*

Site Overview

Photos are representative of the North Central Coast Region and may not be within this MPA.

What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

What is an SMCA?

An **SMCA** is a type of MPA that protects resources by allowing for only specific types of recreational and/or commercial take to occur. (Area restrictions are defined in [Title 14, Section 632\(a\)\(1\)\(C\)](#)).

Point Arena SMCA Overview

- **MPA size:** 6.74 square miles
- **Depth range:** 153 to 324 feet
- **Along-shore span (shoreline):** 3.0 miles

Point Arena SMCA Key Habitats

- **Sand (all depths):** 6.42 square miles
- **Rock (all depths):** 0.24 square miles

Where is Point Arena SMCA?

Boundaries and Regulations

Boundary: This area is bounded by straight lines connecting the following points in the order listed except where noted:

38° 59.000' N. lat. 123° 46.000' W. long.;
38° 59.000' N. lat. 123° 48.162' W. long.; thence southward along the three nautical mile offshore boundary to
38° 56.400' N. lat. 123° 48.350' W. long.;
38° 56.400' N. lat. 123° 46.000' W. long.; and
38° 59.000' N. lat. 123° 46.000' W. long.

Only the following take is allowed in Point Arena SMCA:

1. The recreational take of salmon by trolling.
2. The commercial take of salmon with troll fishing gear.

Point Arena State Marine Conservation Area

How and Why Point Arena was Chosen for an SMCA

MPAs were designed through a collaborative, regional public process by a cross-interest regional stakeholder group (RSG). Using scientific criteria, public input and local resource knowledge the RSG developed MPA proposals. RSG proposals included specific objectives (why the site should be an MPA-*included below*), the classification (type of MPA), boundaries, and regulations. Final MPA proposals were sent to the California Fish and Game Commission (Commission) for their adoption process. Point Arena SMCA was adopted by the Commission in 2010.

North Central Coast RSG Specific Objectives for Point Arena SMCA:

Extend protection to state boundary to encompass deeper habitat & associated species in regional center of high productivity (see *Point Arena SMR Specific objectives*). Protect nearshore reef species & habitats on which they depend while allowing commercial and/or recreational harvest of migratory, highly mobile, or other species where appropriate through the use of SMCA.

Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.
