

# Egg (Devil's Slide) Rock to Devil's Slide Special Closure

North Central California Marine Protected Areas (MPAs), *Established May 2010*

## Site Overview

Photos are representative of the North Central Coast Region and may not be within this Special Closure

## What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

## What is a Special Closure?

A **special closure** is an area designated by the Fish and Game Commission that prohibits access and/or restricts boating activities in waters adjacent to sea bird rookeries or marine mammal haul-out sites.

## Egg (Devil's Slide) Rock to Devil's Slide Special Closure Overview

- **Special closure size:** 0.05 square miles
- **Primary habitat:** Beaches, rocky shores
- **Closure season:** Year round
- **Closure distance:** 300 feet

## Where is Egg (Devil's Slide) Rock to Devil's Slide Special Closure?

## Boundaries and Regulations

**Boundary:** A special closure is designated from the mean high tide line to a distance of 300 feet seaward of the mean lower low tide line of any shoreline of any of the three rocks comprising Egg (Devil's Slide) Rock, located in the vicinity of

37° 34.64' N. lat. 122° 31.29' W. long.;  
37° 34.66' N. lat. 122° 31.32' W. long.; and  
37° 34.63' N. lat. 122° 31.29' W. long.;

and the area bounded by the mean high tide line and straight lines connecting the following points in the order listed:

37° 34.74' N. lat. 122° 31.08' W. long.;  
37° 34.72' N. lat. 122° 31.31' W. long.;  
37° 34.60' N. lat. 122° 31.33' W. long.; and  
37° 34.52' N. lat. 122° 31.21' W. long.

**Permitted/Prohibited Uses:** Special regulations on boating and access apply as follows:

1. Transit in between the rock and the mainland between these points is prohibited at any time.
2. No person except department employees or employees of the United States Fish and Wildlife Service, U.S. Bureau of Land Management, National Oceanic and Atmospheric Administration, or United States Coast Guard, in performing their official duties, or unless permission is granted by the department, shall enter this area.

# Egg (Devil's Slide) Rock to Devil's Slide Special Closure

## How Egg (Devil's Slide) Rock to Devil's Slide was Chosen for a Special Closure

This special closure was developed by a work group made up of members from the larger cross-interest regional stakeholder group (RSG) as part of the Marine Life Protection Act (MLPA). Work group members used local knowledge and input, and scientific data to identify areas where the special closure designation could be applied. Suggested special closure locations were then brought to entire RSG, who after open discussion decided what special closures would be included in their regional marine protected area (MPA) proposal. Final proposals were sent to the California Fish and Game Commission (Commission) for adoption. Egg (Devil's Slide) Rock to Devil's Slide special closure was adopted by the Commission in 2010.

## Why Egg (Devil's Slide) Rock to Devil's Slide was Chosen for a Special Closure

Special closures are designed to minimize the human disturbance of seabirds and marine mammals by restricting boating and access (seasonal or year round) to the area. Smaller than MPAs, special closures work within the overall MPA network to provide localized protection to seabird rookeries or marine mammal haul-out sites in areas of significant importance to the marine ecosystem. In some instances special closures may offer protection from geographically-specific threats that are not necessarily addressed by MPAs including disturbance.

### **North Coast RSG Identified Rationale Egg (Devil's Slide) Rock to Devil's Slide Special Closure:**

This special closure is intended to protect a Common Murre and Brandt's Cormorant colony on Egg Rock. This is a site of a significant seabird recovery project by US Fish & Wildlife Service. Roosting Brown Pelicans are located on both the rock and mainland.
